DISTRICT OF MINNESOTA**

*IN RE CATTLE AND BEEF ANTITRUST
LITIGATION*

This Document Relates To:

COMMERCIAL AND INSTITUTIONAL
INDIRECT PURCHASER PLAINTIFF
ACTION

No. 0:20-cv-1319 (JRT/HB)

**SECOND AMENDED CLASS ACTION
COMPLAINT**

DEMAND FOR JURY TRIAL

REDACTED

Plaintiff Erbert & Gerbert's, Inc. brings this antitrust class action lawsuit on behalf of itself and all persons and entities similarly situated against Defendants Cargill, Inc., Cargill Meat Solutions Corporation (a/k/a Cargill Protein) ("CMS"), JBS S.A., JBS USA Food Company ("JBS USA"), Swift Beef Company ("Swift"), JBS Packerland, Inc. ("Packerland"), National Beef Packing Company ("National Beef"), Tyson Foods, Inc. ("Tyson Foods"), Tyson Fresh Meats, Inc. ("Tyson Fresh") (collectively "Defendants"), and unnamed co-conspirators. Based upon personal knowledge and investigation by counsel, Plaintiff alleges as follows:

I. NATURE OF THIS ACTION

1. Plaintiff brings this action on behalf of itself individually and on behalf of a plaintiff class consisting of all commercial and institutional indirect purchasers of beef¹ that purchased beef other than directly from defendant or co-conspirator in the United States from at least January 1, 2015 until the present (the “Class Period”). Plaintiff brings this action for injunctive relief under Section 1 of the Sherman Act, and for treble damages under the antitrust laws, unfair competition laws, consumer protection laws, and unjust enrichment common laws of the several states against defendants, and demand a trial by jury. Plaintiff alleges that Defendants conspired to constrain beef supplies in the United States, thereby artificially inflating domestic beef prices paid by commercial and institutional indirect purchasers of beef. As a result of Defendants’ unlawful conduct, Plaintiff and the other class members suffered antitrust injury for which Plaintiff seeks treble damages and injunctive relief. Plaintiff also demands a jury trial.

2. Defendants are the world’s largest meat processing and packing companies, known in the industry as meatpackers or packers. In 2018, the operating company Defendants (Tyson Fresh, CMS, Swift/Packerland, and National Beef) (collectively “Operating Defendants”) — sold approximately 80 percent of the more than 25 million pounds of fresh and frozen beef supplied to the U.S. market. Collectively, they controlled

¹ In this Complaint, “beef” means boxed and case-ready meat that has been processed from fed cattle by Defendants and other smaller, nondefendant producers. It excludes ground beef made from culled cows. “Cattle” means fed cattle before they are processed into beef and excludes culled cows. “Fed” cattle means steers and heifers raised in feedlots on a concentrated diet for the production and sale of beef.

approximately 81–85 percent of the domestic cattle processed (or slaughtered) in the market throughout the Class Period. The next largest meatpacker had only a 2–3 percent market share.

3. Since at least the start of 2015, Defendants have exploited their market power in this highly concentrated market by conspiring to limit the supply, and fix the prices, of beef sold to Plaintiff and class members in the U.S. beef market. The principal, but not exclusive, means Defendants have used to effectuate their conspiracy is a scheme to artificially constrain the supply of beef entering the domestic supply chain. Defendants' collusive restriction of the beef supply has had the intended effect of artificially inflating beef prices. As a result, Plaintiff and class members paid higher prices than they would have paid in a competitive market.

4. Recently, the U.S. Department of Justice ("DOJ") and U.S. Department of Agriculture ("USDA") launched investigations into whether Defendants fixed beef prices in the United States. On June 4, 2020, news sources reported, and Plaintiff confirmed, that DOJ's Antitrust Division sent civil investigative demands to Defendants Tyson Foods JBS SA, and Cargill, Inc., and to National Beef (a company related to Defendant National Beef) seeking information about their pricing practices dating back to January 2015.

5. On March 12, 2020, testimony before the Senate Subcommittee on Agriculture, Rural Development, Food and Drug Administration, and Related Agencies, Secretary of Agriculture Sonny Perdue announced that the USDA had begun an investigation into suspiciously high beef prices. Secretary Perdue expressed serious

concern that meatpackers were paying lower prices for live cattle without passing the cost savings on to Plaintiff and other beef purchasers. As he explained, the difference between prices for live cattle and prices for wholesale beef was “historically high.”

6. A confidential witness previously employed by Swift at its Cactus, TX slaughter plant has confirmed the existence of a conspiracy among the Operating Defendants. The witness has confirmed that all the Defendants agreed to reduce their cattle purchases and slaughter volumes for the purpose and effect of increasing their margins (i.e., the spread between what Defendants pay cattle ranchers for fed cattle and the price they charge for beef). Defendants transactional data and slaughter volume records, information published by the USDA, and Defendants’ public calls for industrywide slaughter and capacity reductions corroborate Witness 1’s account.

7. In addition to the high concentration in the wholesale beef industry, other structural characteristics of the domestic beef market facilitate Defendants’ conspiracy. Operating Defendants sit atop the supply and distribution chain that ultimately delivers beef to the market. Their vital role is to purchase cattle from the nation’s farmers and ranchers, slaughter and pack cattle into beef, and sell beef. Operating Defendants’ gatekeeping role has enabled them to collusively control upstream and downstream beef pricing throughout the Class Period.

8. Other market characteristics serve as plus factors and support the inference of collusion among Defendants during the Class Period. These characteristics include producer concentration, high barriers to entry, inelastic demand, the commodity nature

of beef, frequent opportunities to conspire, surging demand, market share stability, and decreased imports. These economic factors encouraged and fomented the formation of Defendants' conspiracy and continue to foster its successful operation.

9. Capitalizing on the fundamental mechanism of supply and demand operating in a beef market vulnerable to successful cartel formation and operation, Operating Defendants illegally collaborated to restrain and manage production of beef in the United States.

10. These practices created surpluses in the cattle market and shortages in the wholesale beef market. These artificial conditions, in turn, drove down the prices Operating Defendants paid for cattle and boosted the prices Operating Defendants commanded for beef. The result intended and achieved by Operating Defendants has been higher profit margins (e.g., meat margins) than would have existed in a competitive market.

11. This growth of Operating Defendants' margins was aided by the way supply and demand operate in the beef industry. The supply of cattle is insensitive to short-term price changes because of the long lifecycle of livestock, livestock's perishable nature, and the lack of any alternative use for livestock. Beef demand is also relatively insensitive to price fluctuations. As a result, Operating Defendants' margins are very responsive to changes in the aggregate volume of slaughtered cattle.

12. Another form of interaction conducive to Defendants' collusion was frequent meetings between each other's executives and key employees. Trade association conferences and other industry events offered convenient opportunities to exchange

information, plans and strategies, and to build relationships. As described throughout this complaint, Operating Defendants seized these opportunities to advance their collusive supply restrictions.

13. By the beginning of 2015, Defendants had begun exploiting favorable market conditions to launch their conspiracy. At that time, they undertook a campaign of throttling the beef supply, which campaign persists today. Publicly available industry data demonstrates Operating Defendants' abrupt transition from competition to collusion. Joint management of their respective slaughter volumes during the Class Period is immediately apparent from Figure 1 below, which tracks their quarterly slaughter volumes and shows them moving in tandem.

14. The results of Defendants' agreement to coordinate slaughter reductions and volume are illustrated in Figures 2 and 3 below. Figure 2 compares the average annual beef cattle slaughter by Operating Defendant and the smaller, non-defendant beef producers in the market before the Class Period (2007–2014) to the same average during the first five years of the Class Period (2015–2019), the years for which data is available.

Figure 2. Average Annual Commercial Slaughter of Cattle

15. Figure 3 also compares the Operating Defendants' and the Independent Packers' annual slaughter volumes during the Class Period and the pre-Class Period, but breaks out the slaughter volume for each year of the Class Period for which data is available. The graph confirms that Tyson Fresh, Swift/Packerland, CMS, and National Beef each slaughtered less fed cattle in every year in the Class Period compared to their

pre-Class Period averages. It also shows that while Tyson Fresh, Swift/Packerland, CMS, and National Beef each gradually increased their slaughter volume from 2016 after their dramatic 2015 reductions, as the supply of fed cattle increased, their rate of increase was vastly outpaced by the slaughter volume increases of Independent Packers during the same period. Operating Defendants thus used periodic slaughter reductions and underutilized plant capacity to ensure their supply of beef never outstripped demand.

Figure 3.
Average Pre- & Post-Class Period Fed Cattle Slaughter—
Operating Defendant vs Others²

16. These figures demonstrate that each Operating Defendant family curtailed its annual slaughter volumes during the Class Period, while the smaller beef processors

² As National Beef acquired Iowa Premium in June 2019, adding 300,000 head to its annual fed cattle slaughter volume. Absent that acquisition, its year-on-year slaughter volume was flat against 2018, while Independent Packers collective slaughter volume rose by approximately 100,000 head (netting out National Beef's acquisition of Iowa Premium).

collectively increased their slaughter volumes during the same period without making up the shortfall of beef created by the conspiracy.

17. As an immediate consequence of Operating Defendants' reduced supply, the beef market experienced a dramatic change of price behavior. Before 2015, prices of cattle and beef predictably moved in tandem. That correlation was the natural economic relationship in a competitive market because beef is simply processed cattle.

18. But, at the start of the Class Period, when Operating Defendants began to cut production, this fundamental economic relationship between cattle and beef prices abruptly changed. The degree of correlation of cattle and beef prices diverged (to Operating Defendants' benefit) without any credible, non-collusive explanation. The relevant supply and demand factors in the industry no longer explained the prices charged to purchasers.

19. Starting in 2015, wholesale beef prices began to show unusual trends. The per-pound price of cattle had historically stayed within 20 to 40 cents of the per-pound average wholesale price of beef. But in 2015, the spread between those prices increased dramatically as Figures 4 and 5 demonstrate.

Figure 4.**Figure 5.**

Years	Farm to Wholesale Price Spread	Proportional Increase
2010 through 2014	\$34.07	
2015 through 2018	\$54.24	59%
2019	\$84.15	55%
2020	\$125.05	49%
2010 through 2014	\$34.07	
2015 through 2020	\$71.03	109%

20. According to USDA Economic Research Service data, the average spread between the average farm value of cattle and wholesale value of beef was substantially higher from January 2015 to present than during the preceding five years. From 2010 to 2014, the average farm-to-wholesale spread was about \$34. But from 2015 to 2018, the average spread was about \$54—a 59% increase. The spread continued to balloon, by 2020 reaching about \$71, a 109% increase from the pre-class period average.

21. Operating Defendants' ability to cut beef production while maintaining inflated beef prices during the Class Period provides compelling circumstantial evidence of their conspiracy. In a beef market free from collusion, if a competitor reduces its purchase of cattle, other competitors quickly pick up the slack to boost their sales and increase their market shares.

22. In that environment, a competitor would not cut its purchases and suffer lost sales thereby compromising any hope of increasing its profit margin. Only colluding meatpackers would expect to benefit by reducing their purchases and slaughter of cattle – because they knew their would-be competitors would not be increasing their purchasing volumes as one would expect in a competitive market. By concertedly slashing their supply output, Operating Defendants have been able to expand their profit margins, confident that none of them would grab volume from another.

23. United by their conspiracy, Operating Defendants were confident that none of them would break ranks and disproportionately expand their beef production to satisfy

unmet demand. Armed with this assurance, Operating Defendants improved their meat margins by achieving and sustaining an unprecedented gap between cattle and beef prices.

24. Aided by their collective market power in the upstream (cattle) and downstream (beef) markets, Operating Defendants' conspiracy allowed them to steadily enlarge their operating margins throughout the Class Period. By the end of 2020, the two largest Defendants, Tyson Foods and JBS USA, were reporting record margins in their beef business. Tyson Foods reported that its beef business' operating margin was nearly 10.7% percent—nearly triple its 2014 operating margin. JBS USA reported a higher beef business margin of 11.5% percent for the first three quarters of 2020.

25. Given these swollen margins, it is little wonder that a leading industry reporter remarked that Defendants "no longer compete against each other," which has enabled them to reap "gangbuster profits."³

26. In summary, Defendants colluded during the Class Period to reduce supplies of beef in tandem thereby raising and fixing beef prices at levels higher than prices that would have prevailed had the beef market been competitive. As a direct result, Plaintiff and class members suffered antitrust injury by paying illegally inflated prices for beef they purchased.

II. JURISDICTION AND VENUE

27. Plaintiff brings this action under Section 16 of the Clayton Act (15 U.S.C. § 26) to secure injunctive relief against defendants for violating Section 1 of the Sherman Act (15 U.S.C. § 1). Plaintiff also brings these state law class claims on behalf of all the classes to recover actual and/or compensatory damages, double and treble damages as permitted, pre- and post-judgment interest, costs, and attorneys' fees for the injury caused by defendants' conduct in restricting the supply of beef and increasing the price of beef. Plaintiff seeks damages in excess of \$5,000,000. This Court has subject matter jurisdiction under 28 U.S.C. §§ 1331, 1337, and Sections 4 and 16 of the Clayton Act, 15 U.S.C. §§ 15(a) and 26.

28. Venue is appropriate in this District under 28 U.S.C. § 1391(b), (c) and (d) because one or more defendants resided or transacted business in this District, is licensed to do business or is doing business in this District, and because a substantial portion of the affected interstate commerce described herein was carried out in this District.

29. This Court has personal jurisdiction over each defendant because, inter alia, each defendant: (a) transacted business throughout the United States, including in this District; (b) manufactured, sold, shipped, and/or delivered substantial quantities of beef throughout the United States, including in this District; (c) had substantial contacts with the United States, including in this District; and/or (d) engaged in an antitrust conspiracy that was directed at and had a direct, foreseeable, and intended effect of causing injury to

the business or property of persons residing in, located in, or doing business throughout the United States, including in this District.

30. The activities of the defendants and all co-conspirators, as described herein, were within the flow of, were intended to, and did have direct, substantial, and reasonably foreseeable effects on, the foreign and interstate commerce of the United States.

III. PARTIES

A. Plaintiff

31. Plaintiff Erbert & Gerbert's, Inc., operates a sandwich shop in Eau Claire, Wisconsin. During the Class Period, Plaintiff purchased beef in Wisconsin, once or more, other than directly from Defendants, entities owned or controlled by Defendants, or other producers of beef for its own business use in commercial food preparation. The beef purchased by Plaintiff was impacted by the conduct of one or more of the Defendants, constituting an antitrust violation as alleged herein, and plaintiff suffered monetary loss as a result of the antitrust violations alleged herein.

B. Defendants

1. The Cargill Defendants

32. Cargill, Inc. is a privately held Delaware corporation with its principal place of business at 15407 McGinty Road, Wayzata, Minnesota 55391. During the Class Period, Cargill, Inc. and/or its predecessors, wholly owned or controlled subsidiaries, or affiliates sold beef in interstate commerce, directly or through Cargill, Inc.'s wholly owned or controlled affiliates, to purchasers in the United States. Cargill, Inc. is the parent company.

33. Defendant Cargill Meat Solutions Corporation (a/k/a Cargill Protein) (“CMS”) is a Cargill, Inc. subsidiary. CMS is a Delaware corporation with its principal place of business at 825 East Douglas Avenue, Wichita, Kansas 67202. CMS is the principal operating entity within Cargill, Inc.’s U.S. cattle and beef business and is a wholly owned subsidiary of Cargill, Inc. On information and belief, CMS owns directly, or indirectly through its subsidiaries, Cargill, Inc.’s U.S. fed cattle slaughter plants, and contracts for the purchase of cattle slaughtered there.

34. Throughout the Class Period, Cargill, Inc. wholly owned, as a direct or indirect subsidiary, CMS and sold, along with CMS, beef in interstate commerce, directly or through this wholly owned or controlled affiliate, to purchasers in the United States.

35. During the Class Period, Cargill, Inc. and CMS shared a unity of corporate interest and operated as part of a single enterprise in furtherance of the conspiracy that purposefully directed conduct causing injury to and derived direct benefit from class members in the United States and this District.

2. The JBS Defendants

36. Defendant JBS S.A. is a Brazilian corporation with its principal place of business at Av. Marginal Direta do Tiete, 500 Bloco 3-30 andar, Vila Jaguara, Sao Paulo 05.118-100, Brazil. During the Class Period, JBS S.A. and/or its predecessors, wholly owned or controlled subsidiaries, or affiliates sold beef in interstate commerce, directly or through JBS S.A.’s wholly owned or controlled affiliates, to purchasers in the United States. JBS S.A. is the parent company.

37. JBS USA Food Company (“JBS USA”) is a Delaware corporation with its principal place of business at 1770 Promontory Circle, Greeley, Colorado 80634. JBS USA is the principal operating entity of JBS S.A.’s U.S. cattle-and-beef business. On information and belief, it is the principal operating entity within JBS S.A.’s U.S. cattle and beef business and the contracting entity for certain of JBS S.A.’s purchases of fed cattle in the United States.

38. Defendant Swift Beef Company (“Swift”) is a Delaware corporation with its principal place of business at 1770 Promontory Circle, Greeley, Colorado 80634. Swift owns directly, or indirectly through its subsidiaries, certain of JBS S.A.’s U.S. fed cattle slaughter plants including the Cactus, Texas; Greeley, Colorado; Grand Island, Nebraska; and Hyrum, Utah plants. On information and belief, Swift contracts for the majority of fed cattle to be slaughtered at these plants.

39. Defendant JBS Packerland, Inc. (“Packerland”) is a Delaware corporation with its principal place of business at 1770 Promontory Circle, Greeley, Colorado 80634. On information and belief, Packerland owns directly, or indirectly through its subsidiaries, certain of JBS S.A.’s U.S. fed and dairy cattle slaughter plants, including the Packerland packing plants in Green Bay, Wisconsin and Plainwell, Michigan, the Sun Land beef plant in Tolleson, Arizona, and the Moyer Packing plant in Souderton, Pennsylvania. On information and belief, Packerland contracts for the majority of fed cattle to be slaughtered at these plants.

40. Various senior staff and executives responsible for the operation of JBS's US fed cattle and beef business during the Class Period were employed by each of JBS USA, Swift, and Packerland.⁴

41. Throughout the Class Period, JBS S.A. wholly owned as direct or indirect subsidiaries, JBS USA, Swift, and Packerland and sold, along with JBS USA, Swift, and Packerland, beef in interstate commerce, directly or through these wholly owned or controlled affiliates, to purchasers in the United States.

42. During the Class Period, the JBS Defendants shared a unity of corporate interest and operated as part of a single enterprise in furtherance of the conspiracy that purposefully directed conduct causing injury to and derived direct benefit from class members in the United States and in this District.

3. The Tyson Defendants

43. Tyson Foods, Inc. ("Tyson Foods") is a publicly traded Delaware corporation headquartered in Springdale, Arkansas. During the Class Period, Tyson Foods and/or its predecessors, wholly owned or controlled subsidiaries, or affiliates sold beef in interstate commerce, directly or through its wholly owned or controlled affiliates, to purchasers in the United States.

44. Defendant Tyson Fresh Meats, Inc. ("Tyson Fresh") is a wholly owned subsidiary of Tyson Foods. Tyson Fresh is a Delaware corporation with its principal place

⁴ See JBS USA's, Swift's, and Packerland's September 25, 2020 Updated Disclosures Pursuant to Attachment 1 of ECF No. 187 in *Peterson, et al. v. JBS USA Food Company Holdings, et al.*, Case No. 19-cv-1129, at 3-7, 12-13.

of business at 800 Stevens Port Drive, Dakota Dunes, South Dakota 57049. Tyson Fresh is the principal operating entity within Tyson Foods' U.S. cattle and beef business.

45. On information and belief, Tyson Fresh owns directly, or indirectly through its subsidiaries, Tyson Foods' U.S. fed cattle slaughter plants and contracts for the purchase of cattle slaughtered there.

46. Throughout the Class Period, Tyson Foods wholly owned as a direct or indirect subsidiary, Tyson Fresh and sold, along with Tyson Fresh, beef in interstate commerce, directly or through this wholly owned or controlled affiliate, to purchasers in the United States.

47. On June 10, 2020, Tyson Foods announced it was fully cooperating with DOJ's price-fixing investigation into the broiler chicken industry under the antitrust division's Corporate Leniency Program.

48. During the Class Period, the Tyson Defendants shared a unity of corporate interest and operated as part of a single enterprise in furtherance of the conspiracy that purposefully directed conduct causing injury to and derived direct benefit from class members in the United States and in this District.

4. National Beef Packing Company

49. National Beef Packing Company ("National Beef") is a privately owned Delaware limited liability company with its principal place of business located at 12200 North Ambassador Drive, Suite 500, Kansas City, Missouri 64163. National Beef and/or its predecessors, wholly owned or controlled subsidiaries, or affiliates sold beef in

interstate commerce, directly or through its wholly owned or controlled affiliates, to purchasers in the United States.

50. On information and belief, National Beef owns directly, or indirectly through its subsidiaries, National Beef's U.S. fed cattle slaughter plants and contracts for the purchase of cattle slaughtered there.

51. "Defendants" includes all Defendants' predecessors, including beef meatpackers merged with or acquired by any Defendant and each Defendant's wholly owned or controlled subsidiaries or affiliates that sold beef in interstate commerce directly to purchasers in the United States during the Class Period.

52. Each of the Defendants sold or distributed beef to beef purchasers or played a material role in the coordinated and collusive behavior alleged. All Defendants were active, knowing participants in the conspiracy alleged, and their conduct, to the extent committed by the Operating Defendants was known to and approved by their parent Defendants.

C. Defendants' co-conspirators

53. Unknown persons, firms, and corporations not named as Defendants participated as co-conspirators with Defendants and performed acts and made statements in furtherance of Defendants' conspiracy. Defendants are jointly and severally liable for the acts of their co-conspirators, whether Plaintiff has named these co-conspirators as Defendants.

D. Reciprocal agency of Defendants and co-conspirators

54. Each Defendant and co-conspirator acted by or through its officers, directors, agents, employees, or representatives while actively engaged in the management, direction, control, or transaction of the corporation's business or affairs.

55. Each Defendant and co-conspirator acted as the agent or joint-venturer of the other Defendants and co-conspirators with respect to the acts, violations, and common course of conduct Plaintiff alleges.

E. Defendant parent and subsidiary companies share a unity of interest

56. The coordinated activity of a parent and its wholly owned subsidiary is viewed as that of a single enterprise for purposes of Section 1 of the Sherman Act and other antitrust laws, unfair competition laws, consumer protection laws, and unjust enrichment common laws.

57. A parent and its wholly owned subsidiary have a complete unity of interest. Their objectives are common, not disparate, and their general corporate actions are guided or determined not by two, separate corporate consciousnesses but by one. Accordingly, the coordinated activity of a parent and its wholly owned subsidiary is viewed as that of a single enterprise.

58. A parent and its wholly owned subsidiary always have a unity of purpose and thus act as a single enterprise whenever they engage in coordinated activity.

59. By controlling, dictating, or encouraging their subsidiaries' anticompetitive conduct in advancement of a common scheme for an illegal and anticompetitive purpose, the parent Defendants independently participated in the illegal enterprise that they entered with their subsidiaries. In doing so, the parent Defendants engaged in sufficient independent conduct and had sufficient knowledge, intent, and involvement in Operating Defendants' conspiracy to be liable under the Sherman Act and other antitrust laws, unfair competition laws, consumer protection laws, and unjust enrichment common laws as a single enterprise with their subsidiaries.

60. During the Class Period, the parent Defendants shared a unity of corporate interest and operated as part of a single enterprise with their subsidiaries, the Operating Defendants, to advance their conspiracy.

1. The Cargill Defendants

61. Rather than owning and operating subsidiaries to diversify risk and earn profits by investing in them, Cargill, Inc. formed subsidiaries to conduct business that it otherwise would have conducted itself. To this end, Cargill, Inc. created CMS to conduct its business in the meat industry that Cargill, Inc. previously operated itself.

62. Cargill, Inc. presents itself and its subsidiaries to the public as a single unified enterprise. For example, on its website, Cargill, Inc. reports that it employs 155,000 workers in 70 countries. Plaintiff is informed and therefore believes and alleges that these numbers include CMS employees. Cargill, Inc. has also publicly announced consolidated

revenues, earnings, and cash flow that Plaintiff believes include performance results from CMS's beef operations.

63. In the Letter to Stakeholders included in Cargill, Inc.'s 2019 Annual Report, Cargill, Inc. reported that it "delivered \$2.82 billion in adjusted operating earnings in fiscal 2019 Revenues dipped 1% to \$113.5 billion. Cash flow from operations totaled \$5.19 billion." On information and belief, those statistics include earnings, revenues, and cash flows from all Cargill, Inc. subsidiaries as well as Cargill, Inc. itself. In the same document, Cargill, Inc. reported that its "[e]arnings were led by our North American protein businesses. With steady domestic and export demand, and plentiful cattle supplies, the beef business posted its third consecutive year of strong performance."

64. There is one unified system that processes both companies' purchase orders, which also demonstrates the relationship between Cargill, Inc. and CMS.

65. Further, Cargill, Inc. operates other business services, including information technology, human resources, finance, transportation and logistics, and procurement, with and for CMS.

66. Cargill, Inc. plays an active role in managing CMS's business operations. As one example, Cargill, Inc.'s website reported that its chairman and CEO, David MacLennan, "supervised several businesses in Cargill Protein," which subsumes CMS.

67. As another example, Cargill, Inc. describes the responsibilities of executive team member, Brian Sikes, as including "leading Cargill's global protein and salt businesses," overseeing "Cargill's protein business in North America and Europe," and

leading “the transformation of the North American protein business.” Mr. Sikes lives in Wichita, Kansas, the principal place of business of CMS.

68. Finally, Cargill, Inc.’s slaughter plants in Fresno, California, Wyalusing, Pennsylvania, and Friona, Texas all list either “Cargill” or “Cargill Beef” as DBAs with the USDA Food Safety Inspection Service.

69. Cargill, Inc.’s extensive involvement in CMS’s management and operations demonstrates these entities’ unity of purpose (e.g., to profit from their price fixing) and common objectives. Cargill, Inc.’s extensive involvement in CMS’s management and operations demonstrates that Cargill, Inc. does far more than provide long-term strategy or guidance to CMS. Cargill, Inc. created CMS as its instrumentality to execute Cargill, Inc.’s directives. Throughout the Class Period, Cargill, Inc. exerted, and had the right to exert, control over CMS. In this manner, Cargill, Inc. independently participated in the illegal enterprise with CMS and, as a result, has sufficient knowledge, intent, and involvement in Defendants’ conspiracy to be found liable under the Sherman Act and other antitrust laws, unfair competition laws, consumer protection laws, and unjust enrichment common laws with CMS as a single enterprise.

2. The JBS Defendants

70. JBS S.A. is not merely a holding company whose business is restricted to investments in operating subsidiaries. JBS S.A. established subsidiaries, including JBS USA, Swift, and Packerland, to conduct its business, including the purchase and processing

of cattle and the sale of beef. Had JBS S.A. not created or acquired these subsidiaries, it would have performed these functions itself.

71. JBS S.A. presents itself as a unified enterprise and conducts consolidated earnings calls on which its corporate representatives discuss the operations and profits of JBS S.A., including JBS USA, Swift, and Packerland. On these calls, JBS S.A. executives have described the beef business it conducts through JBS USA, which it refers to as “JBS beef,” as a “division” or “business unit.” JBS S.A. commonly refers to JBS USA as its “JBS USA beef business[.]” As reported on JBS USA’s financial statements, JBS USA “conducts its United States beef and pork processing businesses through its wholly-owned subsidiaries Swift Beef Company (‘Swift Beef’), Swift Pork Company (‘Swift Pork’) and JBS Packerland, Inc.”

72. JBS S.A. appointed JBS USA’s CEO Andre Nogueira. He “report[s] directly” to JBS Global Operations’ CEO. In Mr. Nogueira’s online “Welcome” message, he explains that JBS USA operates “[i]n partnership with JBS S.A.”

73. Operating Defendants Swift and Packerland are fully integrated into the JBS USA enterprise. They rest under the complete control of JBS USA, and in turn, JBS S.A. JBS USA directs and oversees all JBS’s U.S. cattle procurement, beef processing, and sales operations, with ultimate direction from JBS S.A. JBS USA’s financial statements are replete with references to notes, loans, and credit facilities that “are guaranteed by our Parent, JBS S.A.”

74. The career progression of Wesley Batista Filho clearly demonstrates the level of control JBS S.A. maintains over its subsidiaries, as JBS S.A. installed Wesley Batista Filho into whatever subsidiary they wished, at whatever level they wished, whenever they wished. Wesley Batista Filho is the son of former JBS S.A. CEO Wesley Batista, and the grandson of founder Jose Batista Sabrinho. His grooming to become the next Batista to lead JBS S.A. began with a position as a trainee in the JBS USA beef plant in Greeley, Colorado. He then returned to Brazil, where he worked for JBS S.A. in a variety of roles. Soon after, he became Head of JBS Uruguay, and then Head of JBS Paraguay. He was next installed as Head of JBS Canada. After that, he was made Head of Fed Beef for JBS USA and President of JBS USA and Swift Beef. Now, he is president of all JBS operations in South America.

75. Swift and JBS Packerland's packing operations are presented as those of JBS USA. For example, they appear on USDA's list of Bonded Packers as "JBS USA Food Company, Swift Beef Company" and "JBS USA Food Company, JBS Packerland, Inc.," respectively. The USDA's Food Safety and Inspection Service's Inspection Directory lists "JBS," "JBS USA," and "JBS USA Food Company" amongst other DBAs for Swift.

76. JBS S.A.'s extensive involvement in JBS USA's, Swift's, and Packerland's management and operations demonstrates these entities' unity of purpose (e.g., to profit from their price fixing) and common objectives. JBS S.A.'s extensive involvement in JBS USA's, Swift's, and Packerland's management and operations also reveals that these entities' general corporate actions are guided and determined by one corporate

consciousness. JBS S.A. does more than provide long-term strategy and guidance to JBS USA, Swift, and Packerland. The entire purpose of these subsidiaries is to serve as instrumentalities by executing JBS S.A.'s directives within the greater JBS enterprise. Throughout the Class Period, JBS S.A. exerted, and had the right to exert, total control over JBS USA, Swift, and Packerland. In this manner, JBS S.A. independently participated in the illegal enterprise with JBS USA's, Swift's, and Packerland's and, as a result, has sufficient knowledge, intent, and involvement in Defendants' conspiracy to be found liable under the Sherman Act and other antitrust laws, unfair competition laws, consumer protection laws, and unjust enrichment common laws with JBS USA's, Swift's, and Packerland's as a single enterprise.

3. The Tyson Defendants

77. Tyson Foods is not a mere holding company whose business is restricted to investments in operating subsidiaries. Rather, Tyson Foods formed subsidiaries to act as its agents and representatives to conduct business activities that Tyson Foods would have otherwise conducted. With respect to Tyson Foods' subsidiary Tyson Fresh, those activities include purchasing and processing cattle and selling beef.

78. Tyson Foods holds itself out to the public as a single unified enterprise, describing the beef business it conducts through Tyson Fresh as a mere "business unit." Indeed, before Noel White became Tyson Foods' CEO (now former CEO), he was "group president of Tyson's Fresh Meats business unit."

79. On its quarterly earnings calls, Tyson Foods' corporate representatives include Tyson Fresh when discussing the company's financial performance. On these calls, Tyson Foods announces operating income and returns on sales from its beef segment business that Tyson Fresh operates. More specifically, on these calls Tyson Foods attributes improved returns to actions taken at plants that Tyson Fresh owns and operates.

80. During a January 31, 2014 earnings call, Tyson Foods management employees explained to investors that Tyson Foods had generated \$58 million in operating income and a 1.6% return on sales from its beef segment business, despite that business being operated directly by Tyson Fresh Meats. On the same call, Tyson Foods' managers stated that "as the calf crop declines . . . we'll probably have to curtail production." Production of the beef from the calf crop is an activity which is undertaken by Tyson Fresh.

81. On other earning calls, Tyson Foods has described actions taken by Tyson Fresh to advance Defendants' conspiracy. For example, on its August 3, 2015, earnings call, Tyson Foods explained its strategy for cattle purchasing implemented by Tyson Fresh as "we run for margin and not for market share, we're not willing to overpay for cattle and we've had to cut back on our hours at our plants resulting in inefficiencies and added costs."

82. Similarly, on Tyson Foods' May 7, 2018, earnings call, with respect to beef production plants owned and operated by Tyson Fresh, Tyson Foods explained that "we have to stop production, we have closed plants, several times in the quarter, not every plant, but several plants in the quarter."

83. Tyson Foods and Tyson Fresh also guarantee each other's debts. Tyson Fresh has issued multiple debt securities guaranteed by Tyson Foods. In a registration statement filed with the SEC in 2009, Tyson Foods notified investors that Tyson Fresh pledged not only its own assets to guarantee debt instruments but also those of Tyson Foods and certain "other domestic operation subsidiaries of Tyson [Foods]."

84. Similarly, in a 2014 prospectus filed with the SEC, Tyson Foods stated that Tyson Fresh would act as a guarantor to Tyson Foods' debt securities, including debentures, notes, and all other types of debt. Tyson Foods has issued multiple senior notes under this arrangement, many of which do not mature until 2034 and some of which do not mature until 2044. Some of these debt instruments have been called before their maturity date.

85. Finally, in registrations with the USDA's Food Safety Inspection Service, Tyson Fresh slaughter plants in Dakota City, Nebraska; Lexington, Nebraska; Amarillo, Texas; and identify Tyson Foods as a business name of Tyson Fresh.

86. Tyson Foods' extensive involvement in Tyson Fresh's management and operations demonstrates these entities' unity of purpose (e.g., to profit from their price fixing) and common objectives. Tyson Foods' extensive involvement in Tyson Fresh's management and operations also reveals that these entities' general corporate actions are guided and determined by one corporate consciousness. Tyson Foods does not merely provide long-term strategy and guidance to Tyson Fresh. Tyson Fresh's entire purpose is to execute Tyson Foods' directives within the greater Tyson enterprise and to serve as an

instrumentality of Tyson Foods. Throughout the Class Period, Tyson Foods exerted, and had the right to exert, control over Tyson Fresh. In this manner, Tyson Foods independently participated in the illegal enterprise with Tyson Fresh and, as a result, has sufficient knowledge, intent, and involvement in Defendants' conspiracy to be found liable under the Sherman Act and other antitrust laws, unfair competition laws, consumer protection laws, and unjust enrichment common laws with Tyson Fresh as a single enterprise.

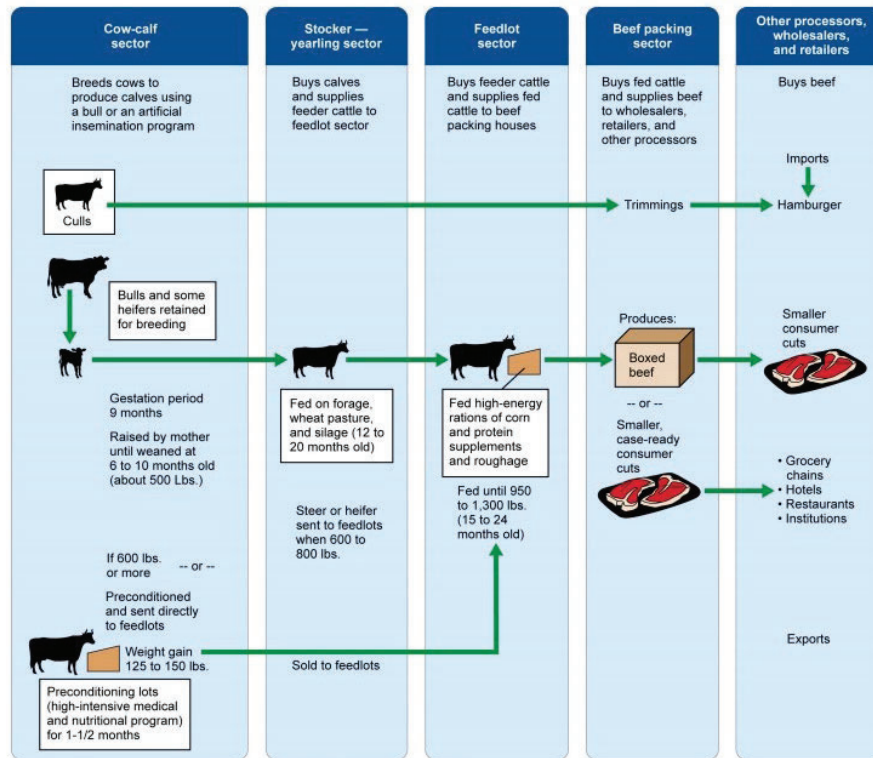

IV. INDUSTRY BACKGROUND

87. The market for fed cattle in the United States is enormous. For example, in 2017 alone, 25.8 million fed cattle were slaughtered and processed into beef products. This amount accounted for 80% of the 32.2 million commercial cattle slaughtered across the United States.⁵

88. The cattle production cycle, running from birth to slaughter, typically ranges between 15 to 24 months, and is the longest of all animals typically raised for meat.

89. Fed cattle progress through three interrelated sectors prior to slaughter: cow/calf; stocking and background; and feedlots, as detailed in Figure 6 below.

⁵ The remaining volume is comprised of slaughter cows (female cattle that have birthed a calf) and bulls, whose meat is typically used for lesser quality beef products such as hamburger patties.

Figure 6.

Source: GAO analysis of U.S. Department of Agriculture and industry information. | GAO-18-296

90. Production of cattle raised for beef takes considerable time and investment. The life cycle of cattle raised for beef is longer than that of any other animal commonly raised for meat. As Figure 6 illustrates, the beef value chain comprises several stages. First, calves are raised by their mothers for six to ten months. When they weigh about 500 pounds, the calves are weaned and sold to the stocker-yearling sector where they eat a diet of forage, wheat pasture, and silage. When a steer or heifer reaches 600–800 pounds, it is sold to a feedlot where it eats corn and protein supplements in addition to roughage.

91. Once cattle reach 950–1,300 pounds, they are sold as fed cattle to the beef-packing stage. Defendants and other beef producers then slaughter and process the cattle

into edible boxed beef and smaller case-ready consumer cuts. A steer weighing 1,000 pounds typically yields about 450 pounds of edible beef.

92. Cattle are sold to beef processors through two channels. About 70 percent of cattle are sold through supply contracts (known as captive-cattle agreements) with feedlots or, to a lesser extent, ranching operations. The rest of the cattle are sold on the spot market, which is typically the benchmark for prices under the captive-cattle agreements. Because Defendants and other beef producers ordinarily have a steady supply of cattle through captive-cattle agreements, they are not forced to buy in the spot market. This affords Defendants the power to suppress the price of captive cattle and cattle purchased in the spot market.

93. Finally, Defendants and other meatpackers sell the beef in the wholesale market, which distributes the beef to retailers or restaurants, grocery chains, and other large retailers.

94. Tyson Fresh, JBS USA/Swift/Packerland, CMS, and National Beef each conduct daily meetings, typically from their head office, attended by representatives of their respective cattle procurement, plant operations, scheduling, beef sales, and risk management teams, among others, to make decisions regarding their respective cattle and beef operations. Among other matters, the attendees of these meetings will discuss the number of cattle their fed cattle business will procure, the terms on which they will be bought, plant scheduling (including slaughter rates) across each of their slaughter facilities, and beef sales strategy.

95. As the cost of fed cattle constitutes the majority of their costs of production, Operating Defendants' profitability is driven by the "meat margin," which is the spread between the price packers pay for fed cattle and the price they charge for beef. The meat margin is very sensitive to changes in industry aggregate slaughter levels, and Tyson Fresh, Swift/Packerland, CMS, and National Beef can, through cooperation, increase it. As noted by the U.S. Department of Justice ("DOJ"), "all else being equal, when the meat packing industry reduces production levels, feedlots and cattle producers are paid less for fed cattle because fewer fed cattle are demanded and customers pay more for [beef] because less is available for purchase. Because the supply of fed cattle and demand for [beef] are relatively insensitive to short-term changes in price, even small changes in industry production levels can significantly affect packer profits."⁶ As a result of these sensitivities, Tyson Fresh, Swift, Packerland, CMS, and National Beef on behalf of their parent companies, Tyson Foods, JBS S.A., JBS USA, and Cargill Inc., can improve their profitability by coordinating their respective slaughter levels at or below the prevailing supply of slaughter-weight fed cattle.

V. OPERATING DEFENDANTS' ANTITRUST VIOLATIONS

96. By the beginning of 2015, Operating Defendants were forced to confront shrinking profit margins for their beef sales. The earnings calls of the two largest

⁶ *U.S. v. JBS*, Case No. 08-cv-5992 (N.D. Ill.), ECF No. 48 ("Amended Complaint"), ¶¶ 26-27. *See also* Section VII(B) below regarding the elasticities of fed cattle and beef.

Defendants, Tyson Foods and JBS S.A., reported the slumping profitability of their beef operations.

97. On a November 7, 2014, earnings call, Tyson Foods reported a quarterly operating margin that was less than half the margin enjoyed by its poultry division.

98. On a November 13, 2014, earnings call, JBS S.A. announced a badly underperforming beef segment at JBS USA. Its quarterly margin reached only about a third of its pork segment's margin.

99. But rather than act independently in their individual business interests to restore profitability, Operating Defendants agreed to collectively reduce and manage their respective slaughter volumes that are made available to the downstream market, including to commercial and institutional indirect purchasers.

100. The consequent beef shortage ushered in a new era of supracompetitive prices paid by Plaintiff and other commercial and institutional indirect purchasers in the beef market.

A. Direct evidence of Defendants' conspiracy

101. As confirmed by Jason F. ("Witness 1"), based on conversations with James Hooker, head of fabrication at Swift's Cactus plant, each of the Operating Defendants expressly agreed to periodically reduce their respective purchase and slaughter volumes, resulting in wholesale prices above competitive levels.

102. Witness 1 is a former employee of Swift. He worked for Swift as quality assurance officer (“QA”) at Swift’s Cactus, Texas slaughter plant, located in the Texas Panhandle. He worked there for over ten years until his employment ceased in early 2018.

103. During the period of his employment coinciding with the Class Period, Witness 1 was a head QA and had primary responsibility for the plant’s kill floor, hotboxes, and coolers. The kill floor is where cattle are slaughtered and dressed, i.e., head, hide, and internal organs removed. The carcasses are then moved to the hotboxes to cool down, before being stored in the coolers ahead of fabrication, where they are broken down into smaller cuts.

104. Witness 1 learned of Operating Defendants’ collusive purchase and slaughter reduction agreement from Mr. Hooker. Mr. Hooker was the head of fabrication at Swift’s Cactus plant and, as explained below, was thus in a position to know about the unlawful agreement.

105. Witness 1 regularly stopped by Mr. Hooker’s office before starting his shift to learn the slaughter and fabrication numbers for that day and the upcoming days. These numbers affected how Witness 1 and his team would execute their responsibilities, including the placement of his team, arrangement of hotbox and cooler space, the number of carcasses they would need to process through the hotbox and coolers that day, and his interactions with USDA inspectors.

106. In addition to the fabrication plan, Mr. Hooker, like Witness 1, also needed to understand the number of cattle scheduled to be slaughtered each day. Amongst other

matters, if the kill volume was lower but the price of beef remained favorable, the fabrication floor would continue to process carcasses at typical rates. However, when kill volumes were reduced and the price of beef was unfavorable, Mr. Hooker may order the carcasses to spend longer in the hot boxes and coolers before being fabricated into beef cuts so as to improve grading performance. In this circumstance, Witness 1 and his team would allow more space between each carcass in the hotboxes. If the kill volume was higher, Mr. Hooker may need to increase the number of carcasses fabricated to ensure there was sufficient space in the hotboxes and coolers, and Witness 1 would need to space the carcasses closer together when filling the hotboxes. Further, the number of carcasses expected to be put into the hotboxes would dictate the amount of air and water Witness 1 and his team used to ensure proper cooling speeds. In sum, it was essential to both Mr. Hooker and Witness 1 that they know the plant's planned slaughter figures in order to perform their core job duties.

107. Witness 1 reports having had a "decent" working relationship with Mr. Hooker.

1. Mr. Hooker Was Well Positioned to Know About Operating Defendants' Agreement

108. Plaintiff understands that Mr. Hooker continues to work at Swift's Cactus plant, where he has worked for over 15 years in that role, including a short stint as head of slaughter operations. Witness 1 reports that before working for Swift in the early 2000s,

Mr. Hooker worked at Tyson Fresh's Amarillo, Texas slaughter plant, where he was also responsible for fabrication.

109. As a fabrication manager for Swift, Mr. Hooker reported directly both to Cactus's General Manager, Manny Guerrero,⁷ and directly to the beef production department of JBS USA/Swift/Packerland's head office in Greeley, Colorado.

110. As head of fabrication, Mr. Hooker needed to be informed as to cattle buying/scheduling, cattle slaughter, and beef selling aspects of JBS USA/Swift/Packerland's fed cattle business. He thus interacted with personnel across JBS USA/Swift/Packerland. In particular, in addition to his direct reports, Mr. Hooker would also speak directly to other managers within the JBS corporate office about plant operations, including scheduled slaughter and fabrication volumes, and fabrication priorities.

111. For example, Mr. Hooker would speak directly to Mr. Sergio Sampaio Nogueira, Head of Operations and Executive Vice President of Plant Operations for JBS's Fed Beef Business during the Class Period, when Mr. Nogueira visited the Cactus plant, which occurred regularly. Witness 1 understands that Mr. Hooker would also speak to Mr. Sergio Nogueira at other times. Mr. Hooker's contact with senior management reflects that JBS USA/Swift/Packerland senior executives maintained direct connections with plant-level managers, like Mr. Hooker, during the Class Period. Mr. Sergio Nogueira was

⁷ Mr. Guerrero worked for CMS for approximately 17 years prior to his move to JBS's Cactus Plant. He was Plant Manager for CMS's Fresno CA plant prior to his departure in early 2012.

installed by Wesley Batista, JBS S.A.'s CEO,⁸ and was regarded as Mr. Batista's "right hand man" in regards to JBS's U.S. beef operations. Mr. Sergio Nogueira had primary responsibility for Swift's fed cattle plant scheduling and/or operations during the Class Period.

112. In addition, Mr. Hooker was responsible for the Cactus plant in the absence of Mr. Guerrero and the Plant Engineer, along with Ryan Wagnon, Head of Slaughter Operations at Cactus. When acting as the Cactus plant's General Manager, Mr. Hooker would liaise closely with fed beef executives from across JBS's head office.

113. Therefore, Mr. Hooker spoke regularly to individuals very highly placed at JBS. Indeed, the following recent photo shows the close working relationship he had with such management:⁹

⁸ Wesley Batista is one of the sons of JBS S.A. founder Jose Batista Sobrinho. Wesley Batista and his brother Joesley Batista took control of JBS S.A. in the early 2000s, prior to JBS' acquisition of Swift and Pilgrim's Pride. Wesley was CEO of JBS S.A., and directed JBS' takeover of Swift. He remained in that role, and as a director and senior executive of JBS USA, Swift and Packerland, until he was implicated in a 2017 bribery and corruption scandal in Brazil, for which he was ousted as CEO and spent time in prison.

⁹ From right to left: James Hooker - Cactus Fabrication Operations Manager; Donna Estrada - Cactus Technical Services Manager; Al Almanza - JBS Global Food Safety Director; Sergio Sampaio - JBS Corporate Director of Operations; Paul Kieker - FSIS Undersecretary USDA Operations; Dr Hafeez - Texas USDA FLS; Dr Mindy Brashears - FSIS Undersecretary USDA FS; Brian McFarlane - JBS Corporate Director of Technical Services; Mark DeRaad - Cactus Value Added Manager; Ryan Wagnon - JBS Slaughter Operations Manager.

114. Mr. Hooker, Mr. Sergio Noguera, and Mr. Wagon, are respectively pictured on the far left, fourth from the left, and far right.

115. In addition to having corporate information for JBS, Mr. Hooker had information regarding the other Operating Defendants. Mr. Hooker regularly told Witness 1 that he was in contact with his former colleagues at Tyson Fresh's Amarillo plant, including his replacement there. Mr. Hooker also told Witness 1 that he had friends and former colleagues with whom he stayed in touch at other Operating Defendants' plants. Mr. Hooker would often provide Witness 1 with detailed information as to the current and future operations of Tyson Fresh, CMS, and National Beef's nearby packing plants.

2. Witness 1 Learns of an Agreement Among Defendants

116. Witness 1 reports having multiple discussions with Mr. Hooker during which Mr. Hooker explained that all of the Operating Defendants reduced their purchase and slaughter volume in order to reduce fed cattle prices when Operating Defendants viewed fed cattle prices as being or becoming “too high” for their liking. During one such conversation, Mr. Hooker specifically admitted that the Defendants had an “agreement” to reduce their purchase and slaughter volumes in response to what they perceived to be high cattle prices.

117. That conversation occurred in 2015. Witness 1 reports that he was in Mr. Hooker’s office when Mr. Hooker received an angry phone call from his immediate supervisor, who worked out of JBS USA/Swift/Packerland’s central office in Greeley, Colorado.

118. After the call concluded, Witness 1 reports that he asked Mr. Hooker how “many are we [Swift, Cactus] cutting [i.e., fabricating]?” Witness 1 reports that Mr. Hooker replied the “cut” was going to be steady that day, but that the “kills are getting cut back, [because the] price is getting too high” (or words to that effect).¹⁰

119. Witness 1 recalls asking Mr. Hooker whether Swift Cactus’s competitor plants were also cutting back their kill. Witness 1 reports he recalls that Mr. Hooker

¹⁰ Witness 1 reports that there was typically a lag between the commencement of a slaughter reduction and the reduction of fabrication activities. Among other reasons, this reflected the fact that Slaughter Plant 1’s fabrication team had to continue to process the carcasses that were already hanging in the coolers.

answered Witness 1's question as follows: "Yes, they are. We have had that agreement that we don't kill while prices are up for a while" (or words to that effect).

120. Witness 1 is certain that Mr. Hooker intended to convey that all Operating Defendants were reducing their slaughter volumes by agreement in response to high prices, and was not simply commenting on the fact that one or some of the Operating Defendants had independently decided to do so.

121. Witness 1 stated that Swift's Cactus plant had a 5,500–6,000 head per day slaughtering capacity and might drop its kill level back to around 4,800–5,200 head per day when implementing Defendants' agreement. When Swift implemented the Defendants' agreement by buying and slaughtering fewer cattle, consequences included running its slaughter plants at reduced hours, operating those plants at lower "chain speeds," and/or scheduling maintenance shutdowns. Witness 1 recalls management at Swift's Cactus plant, including Mr. Guerrero and Mr. Wagnon, telling staff during these periods of reduced slaughter during the Class Period that kill levels were being reduced in response to fed cattle prices.

122. Witness 1 reports that Swift's Cactus Plant would also reduce its slaughter around November and then regularly maintain lower kill volumes through April the following year.

123. Meanwhile, Defendants coordinated and agreed to refrain from expanding their slaughtering and processing capacity, thereby further restricting supply, as further described below.

B. The Available Data Corroborates Witness 1's Account

124. Public reports, Defendants' slaughter data, and the cattle sales data in Plaintiff's possession, indicate that all Operating Defendants reduced and rationed their slaughter volumes during the Class Period resulting in supracompetitive beef prices. Operating Defendants also managed their respective slaughter volumes throughout the Class Period in relative lockstep in order to ensure the supply of beef remained lower than the skyrocketing demand. Operating Defendants did so despite cattle being readily available and as Operating Defendants' margins ballooned.

125. The slaughter reductions, while most obvious at the beginning of each year, occurred at various points throughout the Class Period. In particular, Operating Defendants moderated their slaughter volume across the second and third quarters of most years in a successful attempt to expand their margins, across a number of months, thereby also forestalling both the onset, and minimizing the effect of, the increase in slaughter volume that historically occurs in the fall. Operating Defendants also reacted to short one-to-two week rallies in cattle prices, and one-off opportunities presented by market shocks, such as the fire at Tyson Fresh's Holcomb plant in August 2019.

126. Operating Defendants' joint slaughter management was not a reaction to changes in beef demand, which, as admitted by Tyson Fresh's head of procurement in 2018, had been "off the charts."¹¹ See also Figure 17 below, demonstrating rising beef

¹¹ Tyson Fresh Meats: What the Consumer Demands - John Gerber, VP, Cattle Procurement, Tyson Foods; Kevin Hueser, VP, Beef Pricing, Tyson Foods, from the

demand throughout Class Period. Nor did any Operating Defendant break from the agreement and buy more cattle in an attempt to capture greater market share, despite all posting profit margins clearly demonstrating that no Operating Defendant was running at or near their marginal cost of production. From the end of the first quarter of 2015 through the end of the class period, Operating Defendants posted record per head net margins. Even excluding 2019 and 2020, which saw Operating Defendants' margins skyrocket in the aftermath of the Holcomb plant fire and COVID disruption (discussed below), Operating Defendants average per head margins across the Class Period for the first, second, third and fourth quarters vastly exceeded their pre-Class Period averages (\$37 v. \$0, \$127 v. \$21, \$134 v. \$25, \$116 v. -\$16, respectively).¹²

127. Operating Defendant rationing of the fed cattle supply amongst themselves in parallel throughout the Class Period is demonstrated through Figure 1 below, which records each Operating Defendant's estimated quarterly slaughter volume:

2018 NIAA Antibiotic Symposium: New Science & Technology Tools for Antibiotic Stewardship, November 13-15, 2018, Overland Park, KS, USA, <https://www.youtube.com/watch?v=qCip3WBcqzo>.

¹² Per-head net margin estimates cited in the Complaint sourced from the Sterling Profit Tracker produced by Sterling Marketing Inc. and published weekly on www.drovers.com unless stated otherwise. Pre-class period average per head margins calculated across 1997 to 2014.

Figure 1. Operating Defendant's Quarterly Fed Cattle Slaughter Volume¹³

128. Figure 1 demonstrates that Tyson Fresh, Swift/Packerland, and National Beef each dramatically reduced their slaughter across 2015, while Cargill held its slaughter volumes steady following its 2014 cuts. These artificial reductions worked to cause the

¹³ To derive Tyson, JBS and National's beef slaughter volume figures produced in Figure 2, Plaintiff used Packing Defendants' (in the case of National Beef, its shareholders') financial disclosures and Cattle Buyers Weekly's record of each Defendant's fed cattle and non-fed cattle slaughter ratio to isolate the portion of their reported quarterly revenue figures attributed to beef and by-products produced from fed cattle slaughtered within the United States. Plaintiff then determined the volume of fed cattle (and beef) necessary to generate the disclosed revenue, taking into account prevailing beef and by-product prices (as reported by USDA AMS boxed beef cutout reports and USDA drop-credit values), carcass weights, carcass grading performance (by region), and hot carcass/dressing percentages. Having derived Tyson, JBS, and National Beef's quarterly slaughter volumes, Plaintiff then derived Cargill's quarterly slaughter figures by reference to Cargill's market share over time, and [REDACTED]

dramatic decline in fed cattle prices starting in 2015 and continuing throughout the class period, while beef prices were stabilized or increased.

129. And while the quarterly reporting period obscures certain shorter reductions described below in Section V.C-F, it does detail the remarkable extent to which Operating Defendants' quarter-to-quarter slaughter changes move in lockstep with each other. This parallelism is consistent with and the product of an agreement to jointly manage and reduce their slaughter levels below a competitive level.

130. Figure 1 highlights the parallel reductions made by Operating Defendants in the winter/spring to constrain the seasonal rise in fed cattle prices historically experienced at this time, which had the effect of raising beef prices to a supra-competitive level. Tyson Fresh, Swift/Packerland, CMS, and National Beef each cut production at a similar time and by a similar amount:

- Q1 2015 (except Cargill whose production was flat after making significant cuts in 2014)
- Q1 2016
- Q1 2017
- Q1 2018
- Q4 2019 and Q1 2020

131. This uniform reduction during periods of seasonally lower cattle availability is not evident in the pre-Class Period. For example, in the fourth quarter of 2012, both CMS and Swift/Packerland significantly increased their slaughter volumes (3.7% and

12.0%, respectively on a quarter-on-quarter basis), while Tyson's held its steady (0.1% increase), and National Beef engaged in notable cuts (-4.0% decline). Similarly, in Q3 2013, Tyson Fresh and National Beef increased their slaughter volumes, while Swift/Packerland and CMS reduced theirs. Across Q2 to Q4 2014, Swift/Packerland evidently sought to capture market share, first substantively increasing its slaughter volume in second quarter (16.3% increase against other Defendants increases of between 4.8%-10.2%) before holding it steady across the third and fourth quarters while each other Defendant's volumes declined in those two quarters.

132. What is not apparent from Figure 1, is the deep nature of the cuts in 2015 and 2016 when comparing the same quarter to historic production (2012-2014). In 2015, the production decreased in the year overall and each quarter. For 2016, the production decreased overall and for 3 of 4 quarters. Tyson Fresh, Swift/Packerland, CMS, and National Beef's production was down comparing year-on-year changes against an average of 2012-2014 as seen in Figure 7:

Figure 7.

Year on Year Changes Against 2012 - 2014 Averages				
Comparison	Tyson Fresh	National	Swift/Packerland	CMS
2015 v 2012-14	-4.8%	-13.5%	-17.9%	-11.5%
Q1	-5.1%	-15.3%	-20.1%	-12.7%
Q2	-7.6%	-14.7%	-17.7%	-12.7%
Q3	-0.7%	-15.1%	-16.9%	-9.7%
Q4	-5.8%	-8.7%	-17.1%	-10.8%
2016 v 2012-14	-2.8%	-4.4%	-14.8%	-3.7%
Q1	-4.5%	-14.9%	-21.7%	-9.3%
Q2	-3.7%	-9.1%	-17.9%	-6.2%
Q3	-5.2%	-3.9%	-10.1%	-2.7%
Q4	2.3%	10.9%	-10.2%	3.3%

133. Operating Defendants' strategy was immediately successful, with lower slaughter volumes and lower beef output resulting in artificially high beef prices, despite cash cattle prices falling. Operating Defendants' meat margin expanded rapidly as a result.

134. Moreover, each Operating Defendants' conduct stands apart from Independent Packers' who increased their annual slaughter volume in 2015 by 7.8% year-on-year.

135. And, though Operating Defendants gradually increased their slaughter volumes over the rest of the Class Period, their rates of increase lagged far behind those of other producers, as evidenced by the following Figure 2:

Figure 2.
Average Pre- and Post-Class Period Fed Cattle Slaughter –
Defendants vs. Smaller/Independents

136. Figure 3 compares the annual slaughter volumes of Operating Defendants and smaller producers before and during the Class Period and breaks out these volumes for each year of the Class Period for which data is available. In every year, Operating Defendants slaughtered fewer cattle than they did before the Class Period. Also shown is that, though Operating Defendants gradually increased their slaughter volumes year over year during the Class Period, their rates of increase lagged far behind other producers' rates.

Figure 3.
Pre- and Post-Class Period Fed Cattle Slaughter –
Defendants vs. Smaller/Independents by Year¹⁴

137. As shown in Figures 2 and 3 above, each Operating Defendant slaughtered significantly less cattle in 2015 than their pre-class period average, and then maintained artificially low slaughter levels throughout the remainder of the Class Period. That Operating Defendants each slowly raised their slaughter levels as the availability of fed cattle increased during the class period only reinforces the likelihood of a collective

¹⁴ Cattle Buyers Weekly, “Top 30 Beef Packers” Annual Reports, 2008-2019, <http://www.cattlebuyersweekly.com/users/rankings/index.php> (“CBW Top 30 Beef Packers”); 2018 Meat & Poultry Facts, 47th Ed., NORTH AMERICAN MEAT INSTITUTE, 2019, at 11. National Beef acquired Iowa Premium in June 2019, adding 300,000 head to its annual fed cattle slaughter volume. Absent that acquisition its 2019 slaughter volume was flat as against 2018, while Independent Packers collective slaughter volume rose by approximately 100,000 head (net of Iowa Premium disposal).

agreement to manage slaughter levels after their initial cut – fully five years later, none of the Operating Defendants have returned to their pre-2015 levels despite record profitability, while Independent Packers slaughter is up nearly 50% against their pre-Class Period average, and 25% against their 2015 levels. The result of such action gave Operating Defendants the ability to manage collective demand such that it never outpaced supply, and ensured the supply of beef stayed below demand.

C. Operating Defendants slash production in 2015

138. The impact of the conspiracy was sudden and dramatic in 2015, evidenced by publicly available data. Each Operating Defendant cut its annual cattle slaughter volumes during the Class Period by an average of about 11.3 percent compared to the pre-class period (2007-2014). In sharp contrast, other meatpackers increased their cumulative annual slaughter volumes during the same period by an average of 41.2 percent.

139. Data breaking out slaughter volumes for each year of the Class Period highlight Operating Defendants' extreme reductions in 2015, though other beef producers maintained or increased their volumes that same year. Despite a slight uptick in the final quarter of 2015, Tyson Fresh's overall 2015 slaughter volume was down by 4 percent as compared with 2014 levels, Swift/Packerland by 17 percent, and National Beef by 6 percent. CMS's 2015 production was flat compared with the prior year but 11.3% below historical levels. All this occurred during a sustained recovery in the broader economy and as the U.S. population grew steadily, and beef demand was high.

140. In the first quarter of 2015, Tyson Fresh, Swift/Packerland, and National Beef's year-on-year slaughter was down by approximately -1.8%, -11.2%, and -8.6%, respectively. CMS's quarterly slaughter volume was down against a 2012-2014 average and its first quarter 2015 slaughter volume, like its co-conspirators, was still down on its fourth quarter 2014 volume.

141. These declines were reflected in the Defendants' public reporting. Tyson's May 4, 2015 10-Q noted that its "sales volume decreased [in the quarter ending March 28, 2015, year-on-year] due to a reduction in live cattle processed." Jefferies, National Beef's then majority shareholder, noted in its 10-Q filed May 8, 2015, that National Beef's revenues were down year-on-year for the first quarter "primarily to lower sales volume, as fewer cattle were processed."¹⁵ JBS S.A.'s earnings presentation for the first quarter noted a 1.1% year-on-year decline in the "number of animals processed" by its JBS USA beef unit.¹⁶

142. Expanding on their cuts, Tyson Fresh, Swift/Packerland, CMS, and National Beef extended their joint slaughter reduction during the second and into the third quarters

¹⁵ Jefferies 10-Q, May 8, 2015 at 57, <http://ir.jefferies.com/reports-filings/sec-filings/sec-filings-details/default.aspx?FilingId=10683755>.

¹⁶ JBS S.A., 1Q 2015 Results, May 13, 2015 at 15, https://mz-filemanager.s3.amazonaws.com/043a77e1-0127-4502-bc5b-21427b991b22/central-de-resultadoscentral-de-downloads/8bc0bd99f655d7c38a18d265a7ed397678c5e9774341f1efd1c98745f1a8a360/1q15_earnings_release.pdf. JBS USA Beef segment also encompasses JBS S.A.'s much smaller Australian and Canadian beef businesses and Australian sheep operations. Presentation also noted a -1.1% decline in cattle processing (both fed and non-fed) across its U.S., Australian and Canadian beef businesses. JBS USA's fed cattle to non-fed cattle slaughter ratio throughout the class period was 80% fed, 20% non-fed.

of 2015. Across the second quarter, Tyson Fresh, Swift/Packerland, and National Beef's year-on-year slaughter was down by approximately -5.4%, -12.8%, and -6.2%, respectively. CMS continued to hold to its low 2014 volume, posting an essentially flat year-on-year growth of 1.8% in the second quarter, and -12.7% against its 2012-2014 average second quarter production.

143. Again, this reduction in cattle purchases was also reflected in Tyson Foods¹⁷, JBS S.A.¹⁸, and Jefferies (National Beef's)¹⁹ financial reporting.

144. Operating Defendants' determination to break cash cattle prices through their collective slaughter reductions and reduced cash cattle purchases was remarked upon by industry analysts at the time. On June 12, 2015, analyst Cassandra Fish of "The Beef" and formerly a risk manager at Tyson, speculated as to when one of the Operating Defendants might break ranks:

¹⁷ Tyson's 10-Q for its quarter ending June 27, 2015 recorded year-on-year declines in sales in its beef segment revenue due to a "reduction in live cattle processed". See Tyson Foods 10-Q filed August 2, 2015, p. 38. See also 10-K filed November 23, 2015, p. 29 noting reduction in sales revenue in FY 2015 as against FY 2014 due to lower cattle processing.

¹⁸ JBS S.A., 2Q 2015 Results, August 13, 2015 at 15, https://mz-filemanager.s3.amazonaws.com/043a77e1-0127-4502-bc5b-21427b991b22/central-de-resultadoscentral-de-downloads/02fd1b6f7f1cee632e5af617767bc7a98017ead954465d63d1e8633b2ec5a3cd/2q15_earnings_release.pdf (noting -0.9% decline in cattle processing (both fed and non-fed) across its US, Australian and Canadian beef businesses).

¹⁹ Jefferies 10-Q, August 5, 2015 at 52, <http://d18rn0p25nwr6d.cloudfront.net/CIK-0000096223/6f776d2a-f247-4868-a18b-32f9e3b4eefe.html> (noting revenues for three and six month 2015 periods decreased year-on-year "primarily due to lower sales volume, as fewer cattle were processed"); Jefferies 10-Q, November 5, 2015 at 53 (noting the same in relation to 3Q 2015 and first three quarters of 2015).

Rarely has this industry segment [the beef packers,] been an all-for-one and one-for-all group. All packers need to buy cattle inventory. Most have cut hours. So will someone break ranks, pay up for cattle and add hours to capture the better realization that the next boxed beef rally will bring? Will one short a customer only to find that order filled by a competitor?²⁰

145. Ms. Fish answered her own question a few weeks later, remarking on June 25, 2015 that the “packers refuse to reach for cattle and are currently in command. After 3 weeks of sharply curtailed kills, packers are exhibiting incredible discipline and letting the kill increase gradually,” limiting the ability “of feeders to get all cattle marketed [i.e., sold] in a timely fashion.”²¹

146. During the remainder of 2015, Operating Defendants continued to restrain their slaughter levels and curtail their purchases of cash cattle even after it became clear that slaughter-ready cattle had been “backed up.”²² They did so even though under-utilizing their plants would hurt their margins.

147. Tyson’s CEO, Donnie Smith, admitted as much on August 3, 2015, when discussing Tyson’s decreased purchases over the preceding quarter, noting “[b]ecause we run for margin and not for market share, we’re not willing to overpay for cattle and we’ve had to cut back on our hours at our plants resulting in inefficiencies and added costs. In the short-term, we are negatively impacted, but markets will equilibrate and conditions are

²⁰ Cassandra Fish, *Futures Holding Gains; Waiting on Cash*, THE BEEF (Jun. 11, 2015), <https://www.thebeefread.com/2015/06/11/futures-holding-gains-waiting-on-cash/>.

²¹ Cassandra Fish, *Another Round of the Blues*, THE BEEF (Jun. 25, 2015), <https://www.thebeefread.com/2015/06/25/another-round-of-the-blues/>.

²² Cassandra Fish, *Kills Too Small For Too Long*, THE BEEF (Sep. 8, 2015), <https://www.thebeefread.com/2015/09/08/kills-too-small-for-too-long/>.

expected to improve for the long term.”²³ In response to a question regarding the consequent impact of Tyson’s underutilization of its plant capacity, Mr. Smith elaborated:

In terms of quantifying the impact, we know when we’re running 34s and 36s a week in our plants that that does cost us. It raises the cost in our plant, makes us a lot less efficient, so it does have a cost to us. I don’t know that I can quantify that right off the bat, but it does impact margin.²⁴

148. Tyson Fresh, Swift/Packerland, CMS, and National Beef’s concerted actions to depress cattle prices across 2015 (and their successes) are summarized by the below chart. Figure 8 compares the price of fed cattle across 2015 against the number of fed cattle slaughtered across 2014 and 2015 at packing plants subject to AMS LMR reporting obligations.²⁵ These figures are a very good proxy for Tyson Fresh, Swift/Packerland, CMS, and National Beef’s cumulative slaughter volume as they operate the substantial majority of such plants and appear to provide over 90% of the reported transactions.²⁶ As demonstrated in Figure 8 below, the 2015 slaughter volumes are lower than 2014 in every month except February and November and lower than 2010-2014 averages in every month except October.

²³ Tyson Foods, Q3 2015 Earnings Call, Seeking Alpha Transcript (Aug. 15, 2015).

²⁴ *Id.*

²⁵ Figure 8 was prepared using USDA Market News Service Reports: LM_CT106-National direct slaughter, committed and delivered, LM_CT151-National Weekly-Formula, Forward, Negotiated Net (Domestic), and LM_CT154-Weekly National direct slaughter, negotiated. Fed cattle prices shown in Figure 19 is the weighted average price of all four purchase categories (formula, forward, negotiated (*i.e.*, cash), negotiated grid).

²⁶ See Exhibit 1.

Figure 8.
Total Fed Cattle Slaughter Volumes and Fed Cattle Prices – all purchase types

D. Operating Defendants continued to artificially limit supply into 2016.

149. By “ration[ing] their new purchases [of cattle]” and running shorter 32-hour weeks in early January, Operating Defendants dampened rising cattle prices and extended

the rally in beef prices.²⁷ Operating Defendants then further inflated beef prices by sustaining low kills across February and March.²⁸

150. Tyson Fresh, Swift/Packerland, CMS, and National Beef reduced their slaughter volumes in the first quarter of 2016: Tyson Fresh (-0.7%), CMS (-3.3%), Swift/Packerland (-16.3%), National Beef (-4.4%). Moreover, all Operating Defendants slaughtered fewer cattle than their average first quarter volume across 2012-2014: Tyson Fresh (-4.5%), Swift/Packerland (-21.7%), CMS (-9.3%), and National Beef (-14.9%).

151. As a result, beef prices continued to skyrocket into March 2016, despite significantly lower than expected cattle prices. By rationing the available cattle amongst themselves, Operating Defendants posted average weekly margins of approximately \$63 per head, which was, at that time, one of their “best Q1 in history” and well above their pre-Class Period first quarter average of \$0 per head.²⁹

152. In the second and third quarters, each Operating Defendant’s kill volume remained below their 2012 to 2014 averages.

153. Despite an increase in the availability of fed cattle, except for Cargill, each Operating Defendant’s annual slaughter volume in 2016 remained below their 2014 levels

²⁷ Cassandra Fish, Global Sell Off Smacks Cattle, THE BEEF (Jan. 4, 2016), <https://www.thebeefread.com/2016/01/04/global-sell-off-smacks-cattle/>.

²⁹ Cassandra Fish, This Week’s Cash Trade, THE BEEF (Mar. 22, 2016), <https://www.thebeefread.com/2016/03/22/sell-off-accelerates/>.

(Tyson Fresh (-6%) and Swift/Packerland (-6%)) or flat (National Beef).³⁰ Cargill's 2016 slaughter remained significantly below the 2012-2014 average at -3.7%.

154. Each Operating Defendant's refusal to break from their collective adherence to rationing the available cattle supply is all the more remarkable given the margins on offer to Operating Defendants across 2016. In the third and fourth quarter alone, Operating Defendants were realizing average per head margins on their fed cattle purchases of \$123 and \$153 per head. Not only were these margins significantly above pre-Class Period averages (\$25 and -\$16 per head), but they also exceeded the Operating Defendants' most profitable third and fourth quarters in modern times by about \$30 and \$100 per head, respectively. Operating Defendants therefore had both the incentive and the ability to buy and slaughter more cattle.

E. After historic cuts, Operating Defendants continued to keep supply restrained, resulting in higher beef prices and unprecedented margins into 2017 and 2018

155. Going into 2017, Operating Defendants worked to ensure that any increase in their collective slaughter volumes did not outpace the growth in slaughter weight cattle availability and beef demand. Tyson, Swift/Packerland, CMS, and National Beef each reduced their volumes in lockstep during the first quarter, before raising them together across the second quarter. See Figure 1.

³⁰ 2018 Meat & Poultry Facts, 47th Ed., NORTH AMERICAN MEAT INSTITUTE, 2019, at 11.

156. And while cattle prices did rise from \$119/cwt at the beginning of February to a high of \$144/cwt in first week of May (similar to pre-Class Period spring highs), Operating Defendants responded by reducing their kills.

157. As with 2016, Operating Defendants enjoyed substantial profits across 2017, posting then record per-head margins in the second and third quarters (\$128 and \$147 per head, respectively). Indeed, Operating Defendants' average per head margins for the first and fourth quarter, \$42 and \$88 per head, respectively, stood second only to the quarterly profits they generated in 2016. And again, each Operating Defendant refused to add cattle to expand their market share despite the obvious profit potential. Instead, they kept their production in lockstep with one another, rationing supply amongst themselves to ensure the continued suppression of cattle prices and resulting increase in beef prices.

158. Their scheme continued into 2018. Each Operating Defendant then began to tell the market that they had, as a result of the plant closures discussed, insufficient capacity to slaughter the supposed "wall of cattle" due to reach slaughter-weight in the spring and summer of 2018.³¹ Operating Defendants then backed off their respective kill schedules during the first quarter of 2018.³² See Figure 1, detailing significant decline in first quarter

³¹ Cassandra Fish, *Still Green!?!*, THE BEEF (Mar. 27, 2018), <https://www.thebeefread.com/2018/03/27/still-green/> ("The [packers'] mechanical [slaughter] capacity exceeds needs [across Q2 2018]. The limitation perception is linked to labor. The perception of there being a limitation has created fear and inspired some cattle feeders to "get in line" by selling [cattle] out-front [*i.e.*, on captive supply agreements].").

³² Cassandra Fish, *Futures Trade Both Sides; Cash Poised To Trade Lower*, THE BEEF (Apr. 2, 2018), <https://www.thebeefread.com/2018/04/02/futures-trade-both-sides-cash-poised-to-trade-lower/>

2018 slaughter as against fourth quarter 2017. As Ms. Fish reported, “Looking back at March’s fed slaughter rate, it underperformed expectations. . . . Packers appear to have responded to the tight supply of market-ready cattle in the north by keeping the kill constrained and margins profitable and stable.” The reduction in slaughter occurred despite record strong beef demand and Operating Defendants’ under-utilized capacity.

159. As a result of their commitment to rationing the available cattle amongst themselves, across 2017 and 2018 Tyson Fresh, Swift/Packerland, CMS, and National Beef’s annual slaughter volumes remained 5.4-7.2%, 10.2%, 9.1% and 12.0-12.8% below their pre-Class Period averages, respectively. See Figure 7. By contrast Independent Packers slaughter volume across 2017 and 2018 were up 46.5% and 56.1%, respectively, on their collective pre-Class Period averages.

F. Operating Defendants’ 2019 and 2020 Bring Continued Parallel Slaughter, Reaction Against Independent Self-Interest

160. Going into 2019, beef demand remained “terrific”, encouraging packers to run plants to meet customers’ demand.³³ In ordinary times, absent a conspiracy, Operating Defendants would compete to secure as much cattle as possible to supply beef customers.

161. Instead, Operating Defendants continued to work together to constrain and limit the advance in cattle prices that market conditions warranted. In the first quarter of 2019, each Operating Defendant reduced their slaughter volumes, posting similar quarter-

³³ Cassandra Fish, *How About That*, THE BEEF (Feb. 11, 2019), <https://www.thebeefread.com/2019/02/11/how-about-that-3/> (“Rather obviously, beef demand is terrific. Even in February, notoriously a slow beef demand month. Packer margins are record wide for February.”).

on-quarter declines: Tyson Fresh (-2.4%), National Beef (-4.0%), CMS (-6.6%), and Swift/Packerland (-7.4%). Operating Defendants each maintained comparably lighter slaughter volumes across the first three months of 2019, ensuring that their collective demand did not exceed the available supply. These supply restraints included taking downtime or reducing the number of hours the plant operates. Operating Defendants continued to constrain their weekly kill volume and decline to increase production of beef to meet rising demand, thereby artificially inflating the price of beef.³⁴

162. The resulting impact of Operating Defendants' slaughter restraint at the beginning of 2019 and their continued adherence to a common pricing strategy was that beef prices increased, despite the fact that prices for cattle continued to fall across the summer, working their way to an apparent bottom of about \$109-110/cwt in the end of June. This left producers facing an average \$106 per head loss, against Operating Defendants startling estimated per head profit of \$257.³⁵

163. Despite robust beef demand, Defendants' restrained production left wholesale beef prices higher on a year-on-year basis, despite the fact fed cattle prices were flat. Ms. Fish reported beef prices were "sizzling" despite most cattle producers losing money.³⁶

³⁴ See, e.g., Cassandra Fish, *And the Beat Goes On*, THE BEEF (Feb. 14, 2019), <https://www.thebeefread.com/2019/02/14/and-the-beat-goes-on-2/>.

³⁵ *Sterling Beef Profit Tracker: week ending June 21, 2019*, STERLING MARKETING INC. (June 26, 2019), <https://www.drovers.com/news/industry/profit-tracker-feeding-losses-reach-triple-digits>.

³⁶ Cassandra Fish, *Packers Press and Cash Softens*, THE BEEF (August 9, 2019), <https://www.thebeefread.com/2019/08/09/packers-press-and-cash-softens/>.

164. A slight \$2-3/cwt rise in prices allowed producers to realize a paltry per head profit of about \$24 by the week ending August 9, 2020, against the Operating Defendants' profit of \$192 per head.

165. Notwithstanding the predicted cash cattle strength across August, a chance fire at Tyson's Holcomb, Kansas slaughter and processing plant on August 9, 2019 provided an opportunity for Operating Defendants to work cattle prices lower still, sending cattle producers back into the red. Tyson closed the Holcomb plant indefinitely in the aftermath of the fire.³⁷

166. However, following the plant fire, Tyson Fresh, Swift/Packerland, CMS, and National Beef all slashed their fed cattle bids and hiked their beef prices. These actions caused a \$5/cwt drop in fed cattle prices and a \$14/cwt rise in wholesale beef prices the following trading week.³⁸ This saw Operating Defendants' per head margins rise from \$191 to \$358 in the week ending August 16. The following week, Operating Defendants' margins continued to expand, with the spread between fed cattle prices and beef values

³⁷ *Over 3,800 workers at Tyson Foods beef plant in Kansas out of work after fire*, REUTERS (Aug. 11, 2019, 1:30 PM), https://www.reuters.com/article/us-tyson-foods-fire/over-3800-workers-at-tyson-foods-beef-plant-in-kansas-out-of-work-after-fire-idUSKCN1V10J1?source=content_type%3Areact%7Cfirst_level_url%3Anews%7Csection%3Amain_content%7Cbutton%3Abody_link.

³⁸ *Sterling Beef Profit Tracker: week ending August 16, 2019*, STERLING MARKETING INC. (August 20, 2019), <https://cdn.farmjournal.com/s3fs-public/inline-files/Beef%20Tracker%2081919.pdf>. Live cattle futures contracts were also negatively impacted, with the market responding with two limit-down trading days on September 12 and 13, 2019.

extending to a then-record high of \$67.17/cwt., \$39.51/cwt above the average spread for the same week across 2016-2018.

167. Defendants blamed the loss of Holcomb's 5,500-6,000 head per day slaughter capacity for these price changes. In a competitive market and with record profits, the other Operating Defendants would have wanted to increase their purchases of cattle and increase their slaughter numbers to both taken advantage of the high prices, and to take market share from the industry leader Tyson.

168. Instead, in the month following the Holcomb fire, each Operating Defendant decreased its production. The parallel and coordinated decrease in production in the face of a large supply restraint cannot be explained by legitimate reasons, but instead demonstrates the commitment by the Operating Defendants to maintain high margins and keep cattle slaughter restricted. Figures 9-13 below demonstrate the parallel September cuts:

169. Operating Defendants' purchase and kill reductions in the aftermath of the Holcomb fire ensured that their collective supply remained constrained, giving the Operating Defendants the power to increase beef prices, while paying less for the cattle.

170. Tyson Fresh, Swift/Packerland, CMS, and National Beef consequently reaped record high margins in the weeks that followed the Holcomb fire by stepping down fed cattle prices and raising beef prices in parallel. As cattle prices bottomed out in the week ending September 13, 2019, the spread between Operating Defendants and Cattle Ranchers per head margin exceeded \$600, with packers making over \$400 per head while producers sustained \$200 per head losses.³⁹

G. Defendants idled and closed plants, refrained from expanding processing capacity

171. The conspiracy also entailed a longer-term strategy to restrict beef supplies. Operating Defendants agreed to permanently close processing facilities without replacing most of the lost capacity. These actions came on the heels of reduced production capacity already caused by a series of plant closures shortly before the Class Period, including these:

- a. On January 17, 2013, Cargill Inc. announced it would shut down its Plainview, Texas, beef-processing facility, one of Cargill's larger plants, in just two weeks. This closure cut Cargill's

³⁹ *Sterling Beef Profit Tracker: week ending September 13, 2019*, STERLING MARKETING INC. (September 18, 2019), <https://cdn.farmjournal.com/s3fs-public/inline-files/Beef%20Tracker%2081919.pdf>.

slaughter capacity by 4,650 cattle per day, which was “nearly 4% of the U.S. beef industry current capacity.”⁴⁰

- b. In April 2013, JBS USA followed by acquiring an inactive plant in Nampa, Idaho, only to keep it idle. JBS stated that it had “no immediate plans to reopen the facility,” which would have been capable of processing about 1,100 cattle per day, and, upon information and belief, it remains idle today.⁴¹
- c. In June 2014, National Beef closed its Brawley, California, plant. This eliminated another 2,000 cattle per day of slaughter capacity.⁴²
- d. The next month, Cargill Inc. announced it would also close its Milwaukee, Wisconsin, plant on August 1, 2014. This closure decreased the industry’s slaughter capacity by another 1,300 to 1,400 cattle per day.
- e. Also in 2014, Tyson Foods shut down its Cherokee, Iowa, processing plant. Tyson Foods officials “told the city they would

⁴⁰ Apr. 3, 2013, Votorantim Equity Research Report on JBS.

⁴¹ JBS USA Acquires U.S. Operations of XL Foods, JBS April 4, 2013 Press Release, <https://jbssa.com/about/news/2013/04-04/#.X-eami2ZPow>

⁴² National Beef even rejected a significant package of incentives offered by local government, utilities and nearby feedlots when it decided to close its Brawley plant. “National Beef plant closing Brawley Facility,” PROGRESSIVE CATTLEMEN (Mar. 24, 2014), <https://www.progressivecattle.com/news/industry-news/national-beef-plantclosing-brawley-facility>.

consider handing over the shuttered plant—but not to any firm that they believe is competition.”⁴³ In 2018, Tyson Foods allowed another company to purchase the plant but only after inserting a requirement into the deed that “limited the amount of cattle that can be processed at the plant for the next 10 years.”⁴⁴

172. Operating Defendants continued to shrink the beef industry’s processing capacity when the Class Period began:

- a. On September 11, 2015, Cargill Inc. announced it would sell the Plainview, Texas, plant that it idled in February 2013.
- b. In August 2015, Tyson Food decreased the industry’s slaughter capacity by another 2,000 cattle per day by shuttering its Denison, Iowa plant.

173. By idling these plants, Operating Defendants slashed the industry’s annual slaughter capacity by some two million cattle per year—excluding JBS USA’s continued idling of the Nampa, Idaho plant.

174. While overall industry slaughter capacity increased slightly between 2015 and 2018, this nominal gain was primarily not the work of any Operating Defendant. Instead, it was attributable to other beef-processing companies. For example, One World

⁴³ Available at <https://www.desmoinesregister.com/story/money/business/2016/07/08/held-hostage-tyson-iowa-towns-dilemma/86449400/>.

⁴⁴ Available at <https://www.desmoinesregister.com/story/money/business/2018/09/19/tyson-foods-choke-iowa-plant-iowa-food-group-moves-justin-robinson-pork-beef-chicken-processing/1356962002/>.

Beef Packing restored about 2,000 cattle per day by reopening the Brawley, California plant closed by National Beef in 2014.

175. In sharp contrast to the Operating Defendants' behavior, these other beef processing companies acted consistent with their competitive interests by increasing their capacity and output in response to increased demand for beef, but their increased efforts to supply the downstream market with beef had little effect on the prices due to their nominal market share. Operating Defendants' market dominance and stranglehold on the industry meant that these minor incursions by the few remaining independent processors increased availability only in isolated pockets and had negligible effect on restoring supply (and thereby reducing beef prices) in most locations.⁴⁵

176. In April 2015, Tyson Fresh completed upgrades to its Dakota City, Nebraska, plant. But Tyson only made them after repeated delays in a project that was originally scheduled to be completed about two years earlier. These upgrades fell substantially short of replacing the production capacity that Tyson alone had eliminated shortly before and during the Class Period, much less Operating Defendants' collective capacity elimination.

⁴⁵ JBS was the only Defendant that made any capital investment to increase industry slaughter capacity during the Class Period. JBS expanded its Hyrum, Utah plant in 2015 and 2016. But, according to JBS press releases and several industry publications, the purpose of that expansion was to increase its capacity to process culled dairy cows not fed cattle. Unlike fed cattle, culled cows are not used for beef—the product at issue in this lawsuit—but rather are used for ground beef.

H. Operating Defendants signaled their conspiracy and encouraged each other to maintain it

177. One method that Operating Defendants used to coordinate, promote, and monitor their conspiracy (evident now only with the benefit of hindsight afforded by the disclosure of other now-apparent conspiratorial evidence) was to signal and discuss with each other their activities and plans during earnings calls. Examples of some communications include the following:

- During a May 2014 earnings call, JBS S.A. offered this industry forecast: “For 2015, I think beef will keep being tight. I don’t see any big – an increase in beef supply in 2015.”
- During a May 2014 Q4 earnings call, Tyson Foods communicated that it was striving for margin and not market share: “For FY15, we expect fed cattle supply to be down 5% to 6% from last year, and we think we’ve experienced the bottom of the beef supply cycle. After this year, we believe we’ll see slow incremental improvement in supply. Our beef segment results should improve in the back half of the year, and while profitable for the year, FY15 results are expected to be below FY14. It is important to remember that *we’ll continue to run our beef business for margin, not market share.*”
- During Tyson Food’s Q4 2015 earnings call, Mr. Smith further acknowledged that “You’ve got relatively low cattle supply, you’ve got too much -- well, I should not say too much, *that’s probably not the right way to say it*, but you’ve got excess industry capacity and that limits our ability to drive margins above the 1.5% to 3%, we think.”
- On Tyson Foods’s August 3, 2015, Q3 earnings call, its CEO Donnie Smith admitted it was underutilizing its plants, despite hurting its margins. when discussing Tyson’s decreased purchases over the preceding quarter, noting “[b]ecause we run for margin and not for market share, we’re not willing to overpay for cattle and we’ve had to

cut back on our hours at our plants resulting in inefficiencies and added costs. In the short-term, we are negatively impacted, but markets will equilibrate and conditions are expected to improve for the long term.” He also admitted that “industry capacity utilization [was] probably in the low 70s.” In response to a question regarding the consequent impact of Tyson’s underutilization of its plant capacity Mr. Smith elaborated: “In terms of quantifying the impact, we know when we’re running 34s and 36s a week in our plants that that does cost us. It raises the cost in our plant, makes us a lot less efficient, so it does have a cost to us. I don’t know that I can quantify that right off the bat, but it does impact margin.”

- On its November 12, 2015, Q3 earnings call, JBS USA’s CEO Andre Nogueira de Souza publicly praised Defendants’ efforts to reduce industrywide slaughter capacity through plant closures, remarking that “the reduction that we saw in the cutbacks of production in U.S. . . . that was with the shutdown of nine plants the last two years reduced the cattle. (inaudible) cost us [\$3.5 million]. I think that will be a very good position balancing the industry in 2016, 2017 and 2018.”
- On a May 2016 JBS S.A. Q1 earnings call, JBS USA’s CEO Mr. Nogueira de Souza described the company’s supply strategy: “So I don’t see any imbalance in this near future, even cattle is coming back and we’re going to see a little bit more production of beef this year and next year. It’s still way, way below how it was few years ago and we’ll be balancing at this side because a lot of plant was shut but it’s too way below our historical production level.”
- On its November 2016, Q4 earnings call, Tyson Foods acknowledged the widening of the meat margin: “The dynamic is that the livestock prices have not come – they’ve come down faster than the retail prices have, which has allowed us to make the margins that we have right now in both beef...”

I. Parallel Reductions in Cash Cattle Purchases and Anticompetitive Queuing Conventions

178. Operating Defendants procure their fed cattle in three ways: on the cash cattle trade market (the industry's version of the spot market), through formula or forward contracts, and for Swift/Packerland and CMS relying on their own cattle. Through these contracts the producer agrees to deliver its cattle once they have reached slaughter weight at a price to be determined at the time of delivery.

179. To increase their meat margin, Operating Defendants jointly managed their purchases of domestic fed cash cattle in parallel below the available supply, including by reducing the number and volume of purchases. Operating Defendants took advantage of the supply glut and lower cash cattle prices and increased their meat margin. Operating Defendants expanded their meat margin by refusing to pass-on the savings from the reduced cattle prices to purchasers of beef, which would normally happen in a competitive market. Instead, beef prices remained high while cattle producers, indicating a collusive agreement between Operating Defendants.

180. In addition to Operating Defendants' reduced cash cattle purchases, each employed an antiquated "queuing convention" throughout the Class Period which served to limit producers' ability to generate price competition for their cattle.

181. The convention, which operated predominately in relation to those cattle sold in the cash market, works as follows: once a producer receives a bid from a Packer, the producer may either accept the bid or pass on it, but may not "shop" that bid to other

packers, i.e., require competition for the bidding process. If another Packer offers the same bid as the original bidding Packer, the producer must give the original Packer the right of first refusal.

182. The obligation to give a right of first refusal without consideration is under threat of boycott. Operating Defendants have adhered to and enforced the convention for decades, including across the Class Period, and treat it as a mandatory industry custom.

183. One former feedlot manager, Matt T. (“Witness 2”), confirmed that the field buyers from Tyson Fresh (Brian Alsup), Swift (Levi Canales, and prior to him, Chad Miller), CMS (Rick Vogel, and prior to him, Steve Brown), and National Beef (Richard Duffy) who visited his feedlot enforced strict adherence to this convention with threats of retaliation. In particular, each of these field buyers individually spoke to him about the importance of his feedlot complying with the convention, and that they would not “come by” anymore should he break with it.

184. Witness 2 further reports that when he took over management of the feedlot in 2012, the feedlot would only receive bids from National Beef and CMS. When he subsequently spoke to the field buyers from Tyson Fresh (Mr. Alsup) and Swift (Mr. Miller) responsible for his region in the fall of 2012, they both told him that they had stopped visiting the feedlot because Witness 2’s predecessor had broken with the convention by “shopping” their bids. Witness 2 reports that the Tyson Fresh and Swift field buyers re-commenced visiting the feedlot after he confirmed his commitment to following the convention.

185. Witness 2 also heard from the Operating Defendants' field buyers and other industry participants about other producers being "blackballed" for breaking with the queuing convention. In those circumstances, Witness 2 understood that the Operating Defendant—who was "on the cattle" would be tipped off as to the producer's "breach" of the convention by the field buyer whom the producer contacted while shopping the Operating Defendant's bid, or would ex-post pressure the producer for details of its sale.

186. As evidenced by the expanding meat margin, Operating Defendants collectively refused to pass-on any savings from the anticompetitive conduct toward the cattle producers to Plaintiff and Class Members, instead keeping the ill-gotten gains for themselves.

VI. EFFECTS OF DEFENDANTS' ANTITRUST VIOLATIONS

A. Defendants' conspiracy increased the spread between cattle and beef prices

187. Droughts from 2011 through 2013 caused fed cattle prices to steadily increase. Predictably, wholesale prices of beef moved in tandem, maintaining a constant relationship (or margin) between the two. As a result, Operating Defendants' profits on average were trimmed to margins of only 1 to 3 percent.

188. DOJ has recognized that when the beef market is functioning competitively, a strong relationship exists between the supply of cattle and the price of beef charged to beef purchasers:

[A]ll else being equal, when the meat packing industry reduces production levels, feedlots and cattle producers are paid less for fed cattle because

fewer fed cattle are demanded and customers pay more for [beef] because less is available for purchase. Because the supply of fed cattle and demand for [beef] are relatively insensitive to short-term changes in price, even small changes in industry production levels can significantly affect packer profits.⁴⁶

189. Thus, in a competitive market, lower wholesale beef prices naturally follow lower cattle prices. Once the conspiracy took hold, the spread between cattle and beef prices grew significantly. Operating Defendants' restriction of the beef supply caused cattle prices to slump, while Operating Defendants charged purchasers for beef at elevated prices that would not have existed in the market but for Operating Defendants' artificial supply restraints.

190. Figure 4 is a graph constructed from published USDA data. It captures the steep climb of the spread during the Class Period, which began after a period of very minimal growth from 2012 to 2015:

⁴⁶ *U.S. v. JBS* Amended Complaint, ¶¶26-27.

Figure 4.**Figure 5.**

Years	Farm to Wholesale Price Spread	Proportional Increase
2010 through 2014	\$34.07	
2015 through 2018	\$54.24	59%
2019	\$84.15	55%
2020	\$125.05	49%
2010 through 2014	\$34.07	
2015 through 2020	\$71.03	109%

191. According to USDA Economic Research Service data, the average spread between the average farm value of cattle and wholesale value of beef was substantially higher from January 2015 to present than during the preceding five years. From 2010 to 2014, the average farm-to-wholesale spread was about \$34. But from 2015 to 2018, the average spread was about \$54—a 59% increase. The spread continued to balloon, by 2020 reaching about \$71, a 109% increase from the pre-class period average.

192. Operating Defendants’ ability to cut beef production while maintaining inflated beef prices during the Class Period provides compelling circumstantial evidence of their conspiracy. In a beef market free from collusion, if a competitor reduces its purchase of cattle, other competitors quickly pick up the slack to boost their sales and increase their market shares.

B. Tyson Foods and, jointly, JBS S.A. and JBS USA falsely claimed their record profits were due to market prescience, not supply constraints

193. Throughout 2017 and 2018, on earnings conference calls, executives from JBS S.A. and Tyson Foods frequently attributed their historically high profits to their ability to accurately foresee the volume of cattle that would enter the beef supply chain in the upcoming years. Examples of these boasts include the following:

- On a Q3 2017 earnings call on August 7, 2017, Tyson Foods reported a beef-business operating margin of 3.7 percent for the third quarter and emphasized its confidence in the beef business going forward: “With ample supplies of cattle, we see very good conditions for our beef business as far out as 2020, as we enter the early stages of a multiyear expansion cycle. Absent a shock to the system such as a drought or an import ban, our beef business is well-positioned for profitable, long-term growth.” Tyson

acknowledged that it was considering raising its previously forecasted 1.5–3 percent normalized operating margins. But despite ample supply of cattle and high demand for beef, Defendants did not increase cattle purchases or cattle slaughter.

- On a Q2 2018 earnings call on May 7, 2018, Tyson Foods announced forecasted beef operating margins of 6 percent for the year—at least twice its normalized operating margin range of 1.5–3 percent. Tyson claimed the huge jump was attributable to “those cattle on feed reports and knowing that the supplies in our region are exceptionally good.”
- On JBS S.A.’s Q1 2018 earnings call on May 15, 2018, JBS S.A. reported an EBITDA margin of 6.1 percent for the quarter and forecasted that the company would enjoy record beef margins for the next two quarters. JBS USA’s CEO and President Andre Nogueira emphasized that its performance was not based on “taking share from anyone.”
- On a Q3 2018 earnings call on August 6, 2018, Tyson Foods reported a beef operating margin of 8 percent for the quarter. Tyson Foods stated that it had an “optimistic outlook” because “we have good visibility into 2021 . . . that’s good because we do see the number of animals that are out there.”
- On a Q2 2018 earnings call on August 15, 2019, JBS S.A. reported a beef EBITDA margin of 10.2 percent for the quarter. JBS USA’s CEO and President Andre Nogueira stated that it was “moving the overall margin in beef [to] a different level that was in the past.” JBS added that it benefitted from shutting several plants in the previous five years, and that it could not see how U.S. beef could “be less profitable in 2019 compare [sic] how it is going to perform in 2018.”
- On a Q4 2018 earnings call on November 13, 2018, Tyson Foods reported record beef operating margins of 8.9 percent for the quarter and 6.7 percent for the year and stated that it expected similar results in the following years thanks to visibility into cattle supply: “As we look at 2019, 2020, even in 2021 we frankly we don’t see a lot of change. The supply appears to be relatively stable. We have a good sense of what that looks like just due to

the calf crop that gives us good visibility for at least a couple of years.”

VII. ADDITIONAL PLUS FACTORS ENCOURAGING THE REASONABLE INFERENCE OF DEFENDANTS’ CONSPIRACY

194. The beef meatpacking industry bears all the characteristics of a highly cartelized market: (1) producer concentration; (2) high barriers to entry; (3) commodity product; (4) inelastic demand; (5) opportunities to collude; (6) reduction of imports; (7) market share stability; and (8) production and capacity cuts in the face of increasing demand for beef. These characteristics supported Operating Defendants’ collusion to constrain the number of cattle entering the supply chain, throttle the volume of processed beef sold, raise and fix the wholesale price of beef, and maximize Operating Defendants’ margins.

A. The beef market is highly concentrated

195. Market concentration facilitates collusion. Conspiracies are easier to organize and sustain when only a few firms control a large share of the market. Practical matters, such as coordinating cartel meetings and exchanging information, are much simpler with a small number of players.

196. A high degree of Operating Defendants’ control simplifies coordination because little outside competitive presence exists to undermine the cartel, and Operating Defendants can more easily monitor each other’s actions related to supply and pricing.

197. In a highly concentrated market, higher, long-term profits secured by the cartel's artificially elevated prices outweigh transitory gains in profits and market share that producers might achieved by undercutting their cartel price.

198. The beef industry experienced significant consolidation leading up to and during the Class Period. In 2001, Tyson Foods purchased IBP, Inc., then the nation's largest beef packer. In 2002, Cargill, Inc. purchased Taylor Packing Co. In 2007 and 2008, JBS USA acquired Swift & Co. and Smithfield Beef Group, Inc., the third- and fifth-largest U.S. beef packers.

199. Through these purchases, Operating Defendants collectively controlled about 81–85 percent of the cattle slaughter market throughout the Class Period, while the next largest meatpacker had only a 2–3 percent market share. Operating Defendants' control of the market enabled the conspiracy to launch in 2015 and prosper ever since.

B. The beef market has high barriers to entry

200. Barriers to entry are obstacles that prevent new competitors from easily entering a market. They restrict competition in a market and make it easier for incumbents to collude.

201. A collusive arrangement that raises product prices above competitive levels would, under basic economic principles, attract new entrants seeking to benefit from the profits to be reaped from supracompetitive pricing. But where significant barriers to entry exist, new entrants are less likely to enter the market. Thus, barriers to entry help to facilitate the formation and maintenance of a cartel.

202. Barriers to entry kept would-be competitors out of the beef-packing industry. The construction of a large packing plant requires an investment of at least \$250 million. It normally takes two years or longer to obtain the necessary permits and plan, design, and build the facility. And new entrants must also comply with numerous regulations, recruit and train a large workforce, and develop and execute a successful marketing plan.

203. These barriers have caused new entrants to file for bankruptcy shortly after attempting to enter the market. These casualties include substantial enterprises such as Northern Beef Packers, LP, and Sam Kane Beef Processing, LLC.⁴⁷ Relative insulation from the threat of new competitors has enabled Operating Defendants to maintain their conspiracy.

C. Beef is a commodity product

204. A commodity is a basic item or good used in commerce that is interchangeable with other goods of the same type. Commodities are most often used as inputs in the production of other goods or services.

205. Beef is a commodity. For example, beef roasts from Tyson and Cargill are virtually indistinguishable and have nearly identical nutritional content. The USDA recognizes beef as a commodity and posts daily beef prices. Options and futures for the

⁴⁷ Northern Beef Packers LP filed under Chapter 11 in July 2013 and ceased operations before selling off its assets in December of that year. “Northern Beef Packers sold to White Oak for \$44.3 million,” *The National Provisioner*, Dec. 9, 2013. Sam Kane Beef Processing filed under Chapter 11 in January 2019 and was acquired by STX Beef Co. in February. “Kane Beef plant sale closes, new owner pledges to restart operations,” *Daily Adviser*, Mar. 1, 2019.

cattle from which beef is produced are traded as commodities on the Chicago Mercantile Exchange.

206. Markets for commodity products are susceptible to collusion. Demand for a commodity depends primarily, if not exclusively, on price as opposed to other attributes such as product quality or customer service. As a result, cartel members can more easily monitor compliance and detect defectors.

207. Any observed price discrepancies for commodities are more likely to expose cheating because they cannot as readily be attributed to other factors such as special product features, quality, reliability and durability, or other terms of a transaction.

D. The demand for beef is inelastic

208. Price elasticity describes the sensitivity of suppliers or consumers to changes in the price of a good or service. Demand is inelastic if an increase in the price of a product results in only a small decline, if any, in the quantity sold of that product.

209. Under conditions of inelastic demand, customers have nowhere to turn for alternative, cheaper products of similar quality, and they continue to purchase despite a price increase.

210. For a cartel to profit from raising prices above competitive levels, demand must be relatively inelastic at competitive prices; otherwise, increased prices would result in declining sales, revenues, and profits as customers purchase substitute products or decline to buy altogether.

211. Inelastic demand is a market characteristic that facilitates collusion, allowing producers to raise their prices without triggering customer substitution and lost sales revenue.

212. Beef demand is relatively insensitive to price changes. According to a recent study of beef demand, “since beef has an inelastic demand, industry total revenue increases when prices rise as there comparatively is a limited reduction in volume purchased.”⁴⁸

213. The same study concluded that the relative impact of pork and chicken prices on beef demand is economically small. Operating Defendants’ supracompetitive prices to its purchasers do not significantly reduce beef sales or lead purchasers to seek protein from other meat sources.

E. Defendants took advantage of multiple opportunities to collude

214. Operating Defendants are members of industry trade associations and forums and regularly attend industry events, including the events listed below. These events provide opportunities to exchange pricing, supply, and other competitively sensitive information.

215. For example, the National Cattlemen’s Beef Association (“NCBA”) holds an annual convention, CattleCon, which includes a summer conference, legislative conference, and regional meetings.⁴⁹ The NCBA Product Council, which includes

⁴⁸ Glynn Tonsor, Jason Lusk, Ted Schroeder, *Assessing Beef Demand Determinants*, (Jan. 18, 2018) at 7-9, https://www.beefboard.org/wp-content/uploads/2019/06/Assessing-Beef-Demand-Determinants_FullReport.pdf.

⁴⁹ *NCBA Allied Industry Membership*, NAT’L CATTLEMEN’S BEEF ASS’N (2019), <https://convention.ncba.org/>.

Defendants' representatives and representatives from other packers, meets quarterly for the invitation-only Beef Executive Forum. For example, two of Defendants' executives, former CMS/Cargill Vice President of Cattle Procurement Bill Thoni and former Tyson SVP of Beef Margin Management and VP of Boxed Beef Pricing Kevin Hueser, were both officers, board members, or formally designated participants of the NCBA during the Class Periods. Defendants also participate in meetings of the Beef Checkoff program run by the Federation of State Beef Councils, held contemporaneously with the NCBA summer and winter meetings.

216. The U.S. Meat Export Federation ("USMEF") is another example of a trade association at which Defendants regularly met. The USMEF develops export opportunities for U.S. protein producers and holds both spring and fall conferences and monthly international trade shows.⁵⁰ USMEF leadership includes current and former employees and officers of Defendants. For example, former CMS/Cargill Vice President of International Sales Pat Binger was an officer, board member, or formally designated participant of the USMEF; former Tyson Foods SVP of International Sales Roel Andriessen served as the Chair, Vice Chair, and on the Executive Committee of the USMEF; former Tyson Foods SVP of International Sales and VP International Sales Robert Shuey was a formal participant of the USMEF; National Beef International President and former Vice President of International Sales Peter Michalski served on the

⁵⁰ *Events: Meetings*, U.S. MEAT EXP. FED'N (2019), <http://www.usmef.org/events/bod-meetings/>; *Events: Trade Show Calendar*, U.S. MEAT EXP. FED'N (2019), <http://www.usmef.org/events/trade-shows/>.

Export Committee of the USMEF; and former National Beef NBP International Sales President Mark Domanski served on the Export Committee of the USMEF. Also, in November 2017, Tyson's Roel Andriessen and CMS's Pat Binger both attended the USMEF Strategic Planning Conference in Tucson, Arizona.⁵¹

217. Defendants were among the founding members of the Global and U.S. Roundtables for Sustainable Beef, and they remain members. Defendants participate in its annual meetings each spring, and JBS and Cargill have leadership positions in some of the working groups.

218. Defendants also came together for multiple meetings, conferences, conventions, and expositions sponsored by the North American Meat Institute ("NAMI") and its predecessor, the American Meat Institute. NAMI is a national trade association that represents companies that process 95% of red meat.⁵² Executives and employees of Defendants also participated and held leadership positions in the NAMI. For example, CMS President of Business Operations & Supply Chain and former Cargill Beef President John Keating was an officer, board member, or formally designated participant of the NAMI; former Tyson Foods CEO, Group President of Fresh Meats & International, and COO Noel White served on the Executive Committee of the NAMI; former Tyson Foods

⁵² *See About NAMI*, NAT'L AM. MEAT ASS'N (2019), <https://www.meatinstitute.org/index.php?ht=d/sp/i/204/pid/204>; *Events*, NAT'L AMERICAN MEAT ASS'N (2019), <https://www.meatinstitute.org/index.php?ht=d/sp/i/10422/pid/10422>.

CEO and President Thomas Hayes also served on the Executive Committee of the NAMI; National Beef President and CEO Timothy M. Klein served on the Executive Committee of the NAMI; and JBS USA CEO Andre Nogueira served on the Board of Directors of the NAMI.

219. The NAMI and the Food Industry Association host an annual Meat Conference, which various executives and employees of Defendants attend every year.⁵³ In 2017, National Beef's Timothy Klein, Tyson Vice President of Boxed Beef Pricing Don Kieffer, JBS USA's Andre Nogueira, and CMS Vice President of Sales John Jay, amongst other Defendant executives, were listed as attendees of the Meat Conference.⁵⁴ In 2018, National Beef's Timothy Klein, JBS USA's Andre Nogueira, Cargill Vice President of Retail Beef Business Lead Elizabeth Gutschenritter, and Tyson's Don Kieffer attended the Meat Conference.⁵⁵ In 2019, JBS USA's Andre Nogueira, Tyson's Noel White, National Beef's Timothy Klein, and Cargill's Elizabeth Gutschenritter were listed as attendees.⁵⁶ In

⁵⁵ *2018 Annual Meat Conference Attendee List as of 2.9.2018*, MEAT CONFERENCE (Feb. 9, 2018), <http://meatconference.com/sites/default/files/books/2018%20AMC%20Attendee%20List.pdf>.

⁵⁶ *Meat Conference 2019 Attendee List (as of 2/27)*, MEAT CONFERENCE (Feb. 27, 2019), <http://meatconference.com/sites/default/files/books/2019-AMC-Attendee-List.pdf>.

2020, Tyson’s Noel White and National Beef’s Timothy Klein again signed up to attend the Meat Conference along with various other Cargill and JBS executives and employees.⁵⁷

220. Until April 2017, NAMI sponsored an annual Meat Industry Management Conference, which offered topics such as economics and general business. That conference was then replaced by an annual Meat Industry Summit. This summit has sponsored “networking opportunities and social events” including a golf tournament, receptions, an “Issues, Answers, Actions Breakfast,” the annual NAMI board meeting, and what one publication described as “closed door committee meetings to discuss policies and association business.” The 2017 summit included a presentation by John Nalivka of Sterling Marketing entitled “Economic Outlook for the Red Meat Industry,” described as an “analysis of supply and demand and price forecasts” to “cover all aspects of the supply chain, and help your business prepare for the years ahead.”

221. The beef industry’s Annual Meat Conference, described on the event’s website as “a complete education and networking experience,” provides another opportunity for Defendants to confer. Many of Defendants’ high-level executives have been attending this conference for years. The list of registered attendees in 2012, for example, included eight executives from JBS, Tyson Foods’s then-CEO Donnie Smith, and twelve other Tyson executives.

⁵⁷ 2020 Annual Meat Conference: Registered Attendees, FOOD INDUS. ASS’N (Dec. 9, 2020), <https://www.fmi.org/forms/meeting/MeetingRosterPublic/viewRoster?meetingId=571D81000004FF&includeUnpaid=1&sortBy=title>.

222. Defendants' executives and employees also attended "AgCon," a joint conference from the Commodity Futures Trading Commission and the Center for Risk Management Education and Research at Kansas State University, in 2018.⁵⁸ CMS' Bill Thoni and Tyson's Kevin Hueser were listed as attendees of the 2018 AgCon along with other Packing Defendants' executives and employees, including Tyson Fresh's VP of Sourcing & Risk Management Randall Chambers; Tyson Fresh's VP of Cattle Procurement John Gerber; National Beef Vice President of Cattle Procurement Chad Barker; National Beef Vice President of Procurement and Risk Management Phil Groetken; and JBS USA Head of Risk Management Marco Sampaio.⁵⁹

223. Tyson, JBS, and Cargill Defendant executives also had ample opportunities to meet privately particularly at the beginning of the conspiracy as a result of JBS's acquisition of Tyson and Cargill's Mexican and Brazilian chicken and U.S. pork operations, respectively. JBS S.A.'s purchase of Tyson's Brazilian and Mexican chicken operations was announced on July 28, 2014 and closed on December 1, 2014 and June 29, 2015, respectively,⁶⁰ while its purchase of Cargill's U.S. pork operations was announced on July 1, 2015 and closed on October 30, 2015. Cargill, Tyson, and JBS executives with

⁶⁰ JBS Foods Int'l B.V., Registration Statement (Form F-1) at 112 (Dec. 5, 2016), <https://www.sec.gov/Archives/edgar/data/1691004/000119312516785274/d304020df1.htm>.

responsibilities relating to beef and cattle such as then-Tyson CEO and President Donnie Smith,⁶¹ JBS USA CEO Andre Nogueira,⁶² and then-Cargill Senior Vice President Todd Hall⁶³ were all involved in the acquisition discussions. JBS S.A.’s CEO Wesley Batista stated in July 2015 that its “courtship” with Cargill in relation to its U.S. pork operations “started years ago,” with discussions intensifying at the beginning of 2015, coinciding with the start of the Class Period.⁶⁴

224. These events afford Defendants’ top executives and other employees frequent opportunities to discuss pricing, production, and other proprietary information in an informal setting and monitor compliance with their conspiracy.

F. Defendants exacerbated their supply restraints by continuing to reduce their imports

225. Defendants did not offset their slaughter reductions by importing more cattle into the United States. Rather, imports continued decreasing in 2015 and throughout the Class Period. Figure 15 captures this trend:

⁶¹ *Tyson to sell Mexico, Brazil poultry businesses to JBS*, REUTERS (July 29, 2014, 1:32 PM), <https://www.reuters.com/article/us-tyson-foods-results/tyson-to-sell-mexico-brazil-poultry-businesses-to-jbs-idUKKBN0FX0UR20140729>.

Figure 15.

226. Furthermore, certain Defendants shuttered international plants, thereby decreasing the supply of cattle available to be imported into the United States, which could otherwise have offset Operating Defendants' conspiratorial reductions.

227. Operating Defendants' reduced domestic slaughtering and reduced cattle imports for slaughter combined to raise above competitive levels beef prices paid by Plaintiff and other class members.

G. Defendants' Market Share Stability is Indicative of a Conspiracy

228. In a competitive market, market shares fluctuate as producers compete for and gain business from each other. Stable market shares over time can suggest anticompetitive behavior like that engaged in by Operating Defendants'.

229. Although market-share stability in a commodity market does not itself prove collusion, it strongly suggests operation of an effective cartel that has agreed not to compete. A marked decline in market-share volatility over time may suggest a conspiracy in a previously competitive market.

230. Available data show that Operating Defendants' market shares, measured by wholesale beef sales, became more stable during the Class Period. The same is true for Operating Defendants' market shares as measured by slaughter capacity.

231. Operating Defendants did not do the things true competitors would do in a competitive market. They did not attempt to capture each other's market share or lower prices as their costs declined. Rather, they shared competitively sensitive confidential information.

232. As described in Section V.B., Operating Defendants reduced their output and capacity to produce beef for sale to Plaintiff and class members. In a competitive market, the reduction in output by one producer typically presents an opportunity for competitors to capture market share in the face of constant or increasing demand.

233. But instead, Operating Defendants reduced their output to limit beef supply, which increased beef prices. By acting together to advance their conspiracy, Operating

Defendants sacrificed potential gains for a few via increased market share for larger gains for all by increased prices and profit at the expense of Plaintiff and class members. Figure 16 demonstrates Operating Defendants' overwhelming dominance of the market for the purchase of fed cattle.

H. The Production Cuts Were Implemented Despite Surging Beef Demand

234. Operating Defendants' joint slaughter management was not a reaction to changes in beef demand. Tyson Fresh's Head of Cattle Procurement, John Gerber, admitted at a November 2018 industry conference:

“[The] [c]onsumer will pay more for beef, and have to pay more for beef because it is worth more. There is value out there in chicken and pork, but unless you have been living under a great big rock the last two years, you

know that *beef demand is off the charts*. We have a lot of supply coming at us, but we have been able to hold the price at a pretty good level, because of beef demand, it's been really good, and I think it will stay good⁶⁵

Yet, no Operating Defendant broke from their collective restraint and bought more cattle in an attempt to capture this “off the charts” demand for beef.

235. By February 2019, beef demand was “terrific” and, in ordinary times, would encourage packers to compete to secure more cattle and run plants to meet customers’ demand.⁶⁶

236. This strong beef demand trend continued into the fall of 2019, where the “voraciousness of beef demand [surprised] pretty much everyone in the business.”⁶⁷

237. As shown in Figure 17 below, beef demand rebounded from its low in 2013. That beef demand not only remained strong during the Class Period, but actually steadily increased from its prior lows in the immediate pre-collusion period, is also evident.

⁶⁵ Tyson Fresh Meats: What the Consumer Demands - John Gerber, VP, Cattle Procurement, Tyson Foods; Kevin Hueser, VP, Beef Pricing, Tyson Foods, from the 2018 NIAA Antibiotic Symposium: New Science & Technology Tools for Antibiotic Stewardship, November 13-15, 2018, Overland Park, KS, USA, <https://www.youtube.com/watch?v=qCip3WBcqzo>.

VIII. THE BEEF INDUSTRY FACES GOVERNMENTAL INQUIRIES AND INVESTIGATIONS

238. Price fixing, concerted output restriction, and other anticompetitive conduct, especially in an industry as large, prominent, and vital to national well-being as food production, eventually attract governmental scrutiny. The nation's antitrust enforcers, along with politicians and other government regulators, have an interest in ending such practices—not in leveling false accusations.

239. Over the past year, Defendants' market power and profiteering, made even more unattractive by the COVID-19 pandemic, has caught the attention of politicians and

regulatory bodies. Investigations confirm the egregiousness of Defendants' conduct and suggest Defendants' culpability for their illegal acts.

240. In August 2019, the USDA opened an investigation into the beef industry following a fire at Tyson's Holcomb, Kansas plant. The USDA took notice after the reduction in available supply simultaneously caused cattle prices to fall while elevating beef prices.

241. On March 19, 2020, U.S. Senators Mike Rounds of South Dakota, Kevin Cramer and John Hoeven of North Dakota, and Steve Daines of Montana sent a letter to the DOJ urging the department to launch an investigation into price-fixing in the cattle market. The authors highlighted Defendants' harm to upstream producers and downstream consumers.

242. On a conference call reported in the press, Senator Rounds stated the request was for the DOJ "to definitively answer whether a packer oligarchy exists within the cattle market and inherently creates an anti-competitive marketplace that unfairly disadvantages the cattle producer and the consumer." Senator Rounds further commented, "These margins just don't make any sense. The reality is there is an inverse correlation between the producer's price and the consumer's price."

243. On April 8, 2020, Reuters reported that the USDA had extended its existing investigation to include a pricing dynamic like what was observed after the Holcomb fire—reduced prices paid to ranchers for cattle accompanied by a surge in retail beef prices—in

the wake of announced production shortages associated with the nationwide COVID-19 outbreak.

244. On April 17, 2020, state-level cattle production trade associations from 23 states signed a letter to Attorney General William Barr requesting the DOJ coordinate with the USDA and launch its own investigation into “fraudulent business practices within the meatpacking industry.” Signatories included the Minnesota State Cattlemen’s Association.

245. The letter described the two extraordinary pricing episodes, identified by the USDA, following the Holcomb fire and during the COVID-19 outbreak. The state trade associations not only reported their own plight but also observed that: “The nature of previous and current concern in both situations is extreme market degradation to the producer segment quickly followed by sharp increases and unseasonable profitability to the packing segment through boxed beef prices.”

246. With respect to the most recent manipulations, the letter explained that: “We are now seeing that same type of price action [observed after the Holcomb fire] repeated—only in a more extreme manner and during a time of crisis that includes logistical stressors on the nation’s food production and distribution system.” Indeed, in the last analysis, Defendants’ conduct portends more than mere profiteering. If left unchecked, it will remain a direct and gathering threat to the country’s food security during the current crisis.

247. On May 5, 2020, 11 state attorneys general representing agricultural heartland states, including the Minnesota attorney general, signed a joint letter to Attorney General Barr urging the DOJ to open a coordinated federal antitrust investigation into

“anticompetitive practices by the meat packers in the cattle industry.” This letter reiterated the two-way value extraction made possible by Defendants’ market power: “Cattle ranchers . . . often struggle to survive. Consumers, moreover, do not realize the benefits from a competitive market.”

248. On June 4, 2020, Bloomberg reported that the DOJ had served civil investigative demands on defendants Tyson Foods Inc., JBS SA, Cargill, Inc., and National Beef Inc. in connection with an investigation into antitrust violations consistent with the earlier requests by the producer trade associations and state attorneys general.

IX. ANTITRUST INJURY

249. The cattle market is an oligopsony consisting of the Operating Defendants, which purchase most of the cattle for slaughter and produce most of the beef sold in the wholesale market. When Operating Defendants colluded to restrict supply, the market effectively became a monopsony that left Plaintiff with no choice but to accept whatever price Operating Defendants offered.

250. In a competitive market, the volume of cattle purchased by beef producers (such as Defendants) would equal the volume where supply matches the demand/marginal revenue product curve, and the price for that cattle would be the additional revenue that the producers would receive for cattle.

251. When Operating Defendants collaborated to restrict supply, they exercised their monopsony power to compel Plaintiff to accept the price Operating Defendants offered, thus driving down the market price. In this manner, Operating Defendants’

monopsony power enabled them to maximize their profit by purchasing fewer cattle at a lower price.

252. Further, because imported beef was not offsetting the shortages that Operating Defendants created, the restricted supply of cattle caused a restricted supply of beef in the downstream market to purchasers like Plaintiff.

253. From the standpoint of purchasers of commodity beef, such as Plaintiff, Operating Defendants function as an oligopoly in control of most of the industry supply. When Operating Defendants colluded to restrict supply, the market for beef became a monopoly in which purchasers were forced to buy at prices dictated by Operating Defendants who acted in concert.

254. Because no other source was offsetting the shortages, Operating Defendants created the restricted supply of fed cattle, which in turn restricted the supply of beef in the downstream market to purchasers. Operating Defendants exacerbated this restriction through their concerted manipulation of slaughter capacity and processing volume.

255. Because Operating Defendants had and have accompanying downstream market power, they were able to maximize their profits by colluding to produce volumes based on their marginal revenue curve instead of the market demand curve, which increased prices that Plaintiff and class members paid.

256. Because Operating Defendants did not fear competition from other meatpackers, Operating Defendants' collusion had the dual effect of (a) artificially

decreasing the price that Operating Defendants paid for cattle; and (b) artificially increasing the price they charged for their beef products.

257. Operating Defendants' monopsony power and anticompetitive conduct had the following effects, among others:

- Price competition in the beef market was restrained or eliminated;
- Prices for beef sold by Operating Defendants, their divisions, subsidiaries, and affiliates, and co-conspirators, and, in turn, other beef producers, were raised, maintained, and fixed at artificially high, noncompetitive levels throughout the United States;
- Commercial and institutional indirect purchasers of beef were deprived of free and open competition; and
- Commercial and institutional indirect purchasers paid artificially inflated prices.

258. The purpose of Operating Defendants' and their co-conspirators' conduct was to raise, fix, or maintain the price of beef above a competitive level. As a direct and foreseeable result, Plaintiff and class members paid supra-competitive prices for beef during the Class Period.

259. While direct purchasers were the first to pay supracompetitive prices, the overcharge was passed along the distribution chain and absorbed by plaintiffs and class members when they purchased the beef for business use.

260. Commonly used and well-accepted economic models can be used to measure both the extent and the amount of the supra-competitive charge passed through the chain

of distribution to commercial and institutional indirect purchasers. Thus, the economic harm to plaintiffs and the class member can be quantified.

261. Defendants' violations of the Sherman Act and other antitrust laws, unfair competition laws, consumer protection laws, and unjust enrichment common laws caused Plaintiff and class members to suffer injury to their businesses or property.

262. This harm is an antitrust injury of the type that the antitrust laws were designed to punish and prevent.

X. DEFENDANTS FRAUDULENTLY CONCEALED THEIR CONSPIRACY

263. To invoke fraudulent concealment, Plaintiff must allege facts showing: (a) Defendants' concealment of Plaintiff's cause of action, (b) failure by Plaintiff to discover the existence of their cause of action, and (c) due diligence by Plaintiff in attempting to discover the claim. The statute of limitations is then tolled with respect to Plaintiff's and class members' claims arising from Defendants' illegal conduct.

A. Defendants' concealment of Plaintiff's cause of action

264. Defendants took affirmative actions to fraudulently conceal their antitrust violation.

265. Throughout the Class Period, Defendants effectively, affirmatively, and fraudulently concealed the conspiracy from Plaintiff and class members.

266. Defendants used various means and methods to fraudulently conceal their conspiracy, including but not limited to secret meetings, surreptitious communications between Defendants by telephone or in person meetings to prevent the existence of written

records, limiting any explicit reference to competitor pricing or supply-restraint communications on documents, and communicating competitively sensitive data to each other.

267. The facts alleged in Section V.B. of this complaint describe Defendants' secret behaviors intended to advance their conspiracy. These sections allege the who, what, when, where, and how of Defendants' conspiracy—based on behaviors known only to Defendants to be illegal at the time they performed them—that plausibly suggest Defendants engaged in a fraudulent-concealment campaign.

268. JBS and Tyson often falsely attributed their historically high profits to their ability to accurately foresee the volume of cattle that would enter the beef supply chain in the upcoming years, yet their high profits had nothing to do with foresight and instead were the result of collusion as described in Section VI.B. of this complaint.

269. Accordingly, Defendants concealed their illegal behavior from purchasers, such as Plaintiff and class members, by the following means:

- communicating privately by telephone about their purchases and slaughter volumes so they would not create written evidence of sharing this information, as well as relying on nonpublic forms of communication;
- offering false or pretextual rationales for the low fed cattle prices;
- providing pretextual justifications for their plant closures, slaughter reductions, and withdrawal from the cash cattle trade;
- explicitly and implicitly representing that the fed cattle bids and contract terms were the product of honest competition and not a conspiracy;

- misrepresenting that Defendants complied with applicable laws and regulations, including antitrust laws; and
- misrepresenting the nature of Defendants' agreements (and purported adherence to competitive safeguards) to government officials and the public.

270. During the Class Period, Defendants also lied about their compliance with antitrust laws whose compliance lies at the heart of Plaintiff's antitrust case:

- Tyson's Code of Conduct touts that "[w]e compete in the market with integrity and comply with competition laws [and w]e comply with the letter and spirit of competition laws (also referred to as "antitrust" laws) wherever we do business."
- JBS's 2014 Annual Report asserts that the company has clear policies "[t]o ensure ethical conduct and integrity in the management of its business," including a Manual of Ethical Conduct "that addresses issues related to violations, conflicts of interest, third-party contracts, employment practices, receiving gifts, decision making, anti-corruption practices, and other sensitive topics."
- Cargill stressed in its 2015 Corporate Responsibility report that "[w]e obey the law. Obeying the law is the foundation on which our reputation and Guiding Principles are built We conduct our business with integrity We compete vigorously, but do so fairly and ethically. We ... comply with the laws and regulations that support fair competition and integrity in the marketplace." Cargill reaffirmed this commitment in subsequent Corporate Responsibility reports.
- National Beef's former majority shareholder, Jefferies Financial Group acknowledged in its 2014 Annual Report that National Beef was "subject to extensive government regulation," including the USDA's.

271. As it concerns Cargill, Inc.’s, JBS S.A.’s, and Tyson Foods’s false or pretextual statements or issued false or pretextual data, Cargill, Inc. did so for the benefit of CMS, JBS S.A. did so for the benefit of JBS USA, Swift, and Packerland, and Tyson Foods did so for the benefit of Tyson Fresh because, had these parent Defendants not continually cloaked Operating Defendants’ conspiracy, the entire conspiracy would have been unable to operate. Indeed, these parent Defendants told and perpetuated many of the lies that fueled Operating Defendants’ conspiracy and allowed it to operate.

272. In addition to Defendants having affirmatively concealed their conspiracy, Defendants’ conspiracy was inherently self-concealing because it depended on secrecy for its successful operation. Had the public learned Defendants were conspiring to limit supply and fix prices, their conspiracy could not have survived.

273. Defendants also lied about their plant closures, slaughter reductions, and withdrawal from the cash cattle trade as follows:

1. The Cargill Defendants

274. As discussed above, the Cargill Defendants shared a unity of corporate interest and operated as part of a single enterprise to advance their conspiracy.

275. To facilitate Defendants’ conspiracy, Cargill, Inc. made public statements offering pretextual explanations to cloak Defendants’ unlawful activity. For example, Cargill, Inc. used its 2017 Annual Report to explain that “[r]enewed consumer demand for beef [produced] favorable market conditions in North America.”

276. The following year, Cargill, Inc. proclaimed that its Animal and Nutrition & Protein segment's "strong performance" in 2018 was "fueled by rising domestic and export demand for North American beef" rather than through its price-fixing scheme, which reference Cargill, Inc. understandably avoided.

277. Cargill, Inc. made these false public statements to obscure its role and participation in the conspiracy. Instead of disclosing that its "strong performance" stemmed from the illegal behavior and profits, Cargill, Inc. concocted fabricated business justifications such as "favorable market conditions" and "rising domestic and export demand."

2. The JBS Defendants

278. As discussed above, the JBS Defendants shared a unity of corporate interest and operated as part of a single enterprise to advance the conspiracy.

279. To facilitate the conspiracy, JBS USA made public statements to conceal Defendants' unlawful activity. For example, in November 2015, JBS USA CEO Andre Nogueira declared that "[c]attle price will go down" in the United States because "we are going to see more cattle available."

280. Similarly, in March 2016, JBS S.A.'s CEO Wesley Mendonca Batista, stated that JBS would see "better margin[s]" due to an "increase in the herd in the U.S."

281. JBS executives made similar statements throughout 2016 and 2017 and into 2018, regularly claiming that JBS's strong financial performance in the United States was

a result of “more cattle available in the U.S.,” “cattle price[s being] back to the normal level,” and “strong demand for beef.”

282. Instead of disclosing that the “improvement in EBITDA margin” was the result of illegal profits from the conspiracy, JBS offered false business justifications such as “more cattle available in the U.S.” and cattle prices returning “back to the normal level.” JBS made all these false public statements to disguise its role and participation in the conspiracy.

3. National Beef

283. To facilitate the conspiracy, National Beef, through its majority shareholders Jefferies Financial Group Inc. and later Marfrig Global Foods S.A., used public statements to conceal Defendants’ unlawful activity.

284. For example, in October 2015, Jefferies stated that the anticipated expansion of the cowherd “bodes well for [meatpacking industry] margins as it will lead to an increase in the number of fed cattle available for slaughter.”

285. In October 2016, Jefferies explained that the “rebuilding of the domestic US cattle herd ha[d] dramatically affected the market for fed cattle” when justifying how, “[f]rom June 27, 2015 to June 25, 2016, the average market price per pound of fed cattle ha[d] fallen from \$1.48 to \$1.16.”

286. Jefferies offered similar justifications throughout 2017 and 2018, such as “National Beef generated record results for [the last 12 months] on the back of a more balanced supply of cattle and robust end market demand,” “an increased supply of cattle in

2017 has driven higher margins and greater capacity utilization versus 2016,” “pre-tax income grew by \$78.3 million, as increased cattle availability and strong demand for beef continued to support strong margins,” and “because the peak in supply of fed cattle ready for slaughter lags the peak size of the beef cowherd, throughput should continue to increase for at least the next several years, supporting continued above-average packer margins.”

287. These statements were made during Jefferies Financial Group Investor Day presentations in 2015, 2016, and 2017, at which National Beef’s CEO and President, Tim Klein, was scheduled to speak on topics related to National Beef’s performance.

288. Marfrig similarly offered false justifications for the low prices caused by the conspiracy after Marfrig acquired a controlling stake in National Beef.

289. For example, Marfrig reported in November 2018 that, “[i]n the United States, the cattle availability combined with stronger domestic and international demand has been supporting better margins.”

290. In 2018, during a third-quarter company earnings call, Marfrig executives reiterated the preceding paragraph’s point by claiming that “the U.S. beef industry has delivered record results” because of “an ample supply of cattle” and “strong demand in both the domestic and international markets.” Although Marfrig declared that it had attained record results and better margins while reducing cattle slaughter volumes, it misrepresented that these results were due to “fewer weeks in the third quarter 2018 compared to the third quarter 2017.”

291. National Beef CEO, Timothy M. Klein—referred to by Marfrig CEO, Eduardo de Oliveira Miron, as “CEO of [Marfrig’s] North American Operations”—participated in the 2018 call.

292. Marfrig announced in the fourth quarter of 2018 that it attained a “[s]olid result from North America Operation, sustained by strong demand for beef protein and the higher cattle availability.”

293. Jefferies and Marfrig made these pretextual public statements on behalf of National Beef—which, as alleged above, was the original source of the pretextual public statements—to obscure their role and participation in the conspiracy. Instead of disclosing that their record results and better margins stemmed from the illegal prices implemented by the conspiracy, Jefferies and Marfrig claimed these results were due to ample supply of cattle, higher cattle availability, and strong demand.

4. The Tyson Defendants

294. As discussed above, the Tyson Defendants shared a unity of corporate interest and operated as part of a single enterprise to advance the conspiracy.

295. To facilitate the conspiracy, Tyson Foods made public statements to conceal Defendants’ unlawful activity. For example, Tyson Foods used its SEC filings from 2015 to 2018 to declare that it had “limited or no control” over the pricing and production of cattle because prices were “determined by constantly changing market forces of supply and demand.”

296. As for the factors that influence the cost of cattle, Tyson identified “weather patterns throughout the world, outbreaks of disease, the global level of supply inventories and demand for grains and other feed ingredients, as well as agricultural and energy policies of domestic and foreign governments.”

297. Tyson further stated that it “ceased operations at our Denison, Iowa plant” to “better align our overall production capacity with current cattle supplies.” Tyson claimed that “[t]he beef segment earnings improved . . . due to more favorable market conditions associated with an increase in cattle supply which resulted in lower fed cattle costs.”

298. Rather than truthfully disclosing that the conspiracy improved its earnings, Tyson Foods issued false business justifications such as lower fed cattle costs and favorable market conditions. Tyson Foods made these misrepresentations to cover up its role and participation in the conspiracy.

299. There was no truth to Defendants’ foregoing statements. Rather, Defendants made them to mislead Plaintiff into believing they were acting legally as keeping Plaintiff and class members in the dark would allow Defendants’ price-fixing conspiracy to operate and for Defendants to profit from it.

B. Plaintiff was unable to discover the existence of Operating Defendants’ conspiracy

300. Plaintiff only recently learned about Witness 1, as early as April 25, 2019, upon the filing of cattle ranchers’ complaint. Witness 1 offers direct evidence that the beef industry has been colluding to fix prices.

301. Plaintiff also only recently learned about the USDA and DOJ investigations into price fixing in the beef industry, as early as March 12, 2020.

302. Before Witness 1's account and the revelation of the government's investigations, no facts existed that could have or should have reasonably suggested or disclosed to Plaintiff or class members the possibility of price fixing in the beef industry.

303. The discovery of Witness 1 and the government's investigations put Plaintiff and class members on inquiry notice of Operating Defendants' price fixing in the beef industry.

304. Operating Defendants' conspiracy, by its very nature, was self-concealing. Beef is not exempt from antitrust regulation, and thus, before these recent events Plaintiff reasonably considered it to be a competitive industry. Accordingly, a reasonable person under the circumstances would not have been alerted to begin to investigate the legitimacy of Operating Defendants' beef prices before these recent events.

C. Plaintiff exercised due diligence in attempting to discover their claim⁶⁸

305. Plaintiff and class members could not have learned of Operating Defendants' anticompetitive conduct until recently through disclosures by Witness 1 and the existence of governmental investigations. Market conditions that Operating Defendants—and, accordingly, Plaintiff—ascribed to legal behavior did not put Plaintiff on inquiry notice.

⁶⁸ Since due diligence is an affirmative defense, Plaintiff need not necessarily plead it here, but does.

306. Operating Defendants' concealment was successful—that is, because of their concealment, Plaintiff was unable to discover the existence of their antitrust claim.

307. Because of Operating Defendants' fraudulent concealment, Plaintiff and class members had insufficient information concerning Operating Defendants' misconduct on which to base a complaint and could not have discovered, until their recent exercise of due diligence, Operating Defendants' conspiracy.

308. Because of Defendants' affirmatively made public statements giving pretextual reasons for their record profits, Plaintiff's attention was not raised sufficiently to require them to take affirmative steps to uncover Operating Defendants' conspiracy. Relatedly, DOJ's investigation into the seafood and broilers industries did not—and could not have been expected to—attract Plaintiff's attention because these investigations did not involve the beef industry and because though the broilers and pork industries utilize Agri Stats the beef industry does not.

309. Because of Defendants' misrepresentations, the lack of the involvement of Agri Stats in the beef industry, and Defendants' success and precision in cloaking their illegal behavior, Plaintiff lacked reasonable awareness of suspicious circumstances or storm warnings sufficient to trigger the duty to investigate.

310. A reasonable person would not have discovered the conspiracy through any of Defendants' statements. As such, the most reasonable time for Plaintiff's duty to inquire to arise was following Witness 1's revelations and indication of the government's investigations.

311. An April 2018 General Accounting Office (“GAO”) report did not reveal Defendants’ anticompetitive conduct. The GAO had limited investigative authority and “did not obtain and review internal packer documents.” This report did not consider whether Defendants engaged in anticompetitive behavior of the type alleged here. Plaintiff and class members have neither obtained nor reviewed internal packer documents.

XI. DEFENDANTS ENGAGED IN CONTINUING ANTITRUST VIOLATIONS

312. A continuing violation restarts the statute of limitations period each time Defendants commit an overt act.

A. Defendants Renewed their Conspiracy with New and Independent Acts

313. During the Class Period, Operating Defendants continued to make sales of beef whose prices were fixed as the result of Operating Defendants’ continually renewed and adjusted price-fixing agreement. Operating Defendants needed to continually renew and adjust their price-fixing agreement to account for ever-fluctuating economic and market conditions.

314. Defendants’ meetings and misrepresentations were overt acts that began a new statute of limitations because these events advanced the objectives of Defendants’ conspiracy. Indeed, every statement involved different facts and suggestions but sprang from the same seed—Defendants’ conspiracy.

315. Defendants’ overt acts, which were new acts beyond the initial price fixing that were necessary to perpetuate Defendants’ agreement, continued throughout the Class

Period. Each sale of beef by an Operating Defendant at a supracompetitive price was a new overt act that was part of Defendants' antitrust violation that injured Plaintiff and class members and started the statutory period running again.

316. Defendants' overt acts were new and independent acts that perpetuated their agreement and kept it current with market conditions; they were not merely reaffirmations of Defendants' previous acts. By constantly renewing and refining their agreement to reflect market conditions, Defendants inflicted new and accumulating injury on Plaintiff and class members.

317. This reality is most easily recognized when considering the Holcomb fire and onset of COVID-19. [REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

[REDACTED]

B. Defendants Inflicted New and Accumulating Injury on Plaintiff

318. Each purchase by Plaintiff and class members through the Class Period of Operating Defendants' beef, the price of which resulted from Operating Defendants' continually renewed and adjusted price-fixing agreement, necessarily caused new and accumulating injury to Plaintiff and class members.

319. As the concept of a continuing violation applies to a price-fixing conspiracy that brings about a series of unlawfully high-priced sales over a period of years, each purchase of beef by Plaintiff starts the statutory period running again regardless of the Plaintiff's knowledge of the alleged illegality at much earlier times. This means that each illegally priced sale of beef constituted a new cause of action for purposes of the statute of limitations.

320. To adequately allege that a continuing violation has occurred, Plaintiff must plead: (a) a price-fixing conspiracy; (b) that brings about a series of unlawfully high-priced sales during the Class Period; and (c) sales during the Class Period.

321. This complaint alleges, via direct and indirect evidence, the existence of Operating Defendants' price-fixing conspiracy.

322. Operating Defendants' conspiracy continued into the non-time-barred Class Period—that is, four years before Plaintiff filed its complaint.

323. As alleged throughout this complaint, Operating Defendants' price fixing began in at least 2015 (slightly more than four years ago), and many of Plaintiff's factual assertions alleged regard Operating Defendants' 2015 (or earlier) misconduct. But Plaintiff also alleges that Operating Defendants' misconduct continued throughout the Class Period, alleging facts that would not have occurred had the conspiracy disbanded.

324. Many of Operating Defendants' illegal acts occurred in at least 2015 and continued throughout the Class Period. See *supra* Section V.B. and Figures 1–3, 7–13

(describing Defendants' overt illegal acts beginning in at least 2015 and extending into the four-year period before Plaintiff filed its complaint).

325. Plaintiff alleges that Operating Defendants constantly coordinated and communicated with each other beginning in at least 2015 and throughout the Class Period. The fact that they maintained such communications makes plausible the allegation that their conspiracy continued from at least 2015 through present. See *supra* Sections V.B. and VI.B. (describing coordination and communications among Operating Defendants at least as early as 2015 and continuing throughout the Class Period). In this manner, Operating Defendants' conspiracy continued during the four years preceding the filing of Plaintiff's first complaint.

326. Each of the beef industry's plus factors were present at least as early as 2015: high market concentration, commodity product, inelastic demand, high barriers to entry, and trade association meetings that occurred each year and provided the Operating Defendants the continual opportunity to conspire.

XII. CLASS ACTION ALLEGATIONS

327. Plaintiff brings this action on behalf of itself and as a class action under Rule 23(a) and (b)(2) of the Federal Rules of Civil Procedure, seeking equitable and injunctive relief on behalf of the following class (the "Nationwide Class"):

All commercial and institutional purchasers in the United States and its territories that purchased beef, once or more, other than directly from Defendants, entities owned or controlled by Defendants, or other producers of beef, from January 1, 2015 to present for their own business use in

commercial food preparation. Excluded from the Nationwide Class are the Court and its personnel, and any Defendants and their parent or subsidiary companies.

326. Plaintiff also brings this action on behalf of itself and as a class action under Rule 23(a) and (b)(3) of the Federal Rules of Civil Procedure seeking damages pursuant to the common law of unjust enrichment and the state antitrust, unfair competition, and consumer protection laws of the states and territories listed below (the “Indirect Purchaser States”)⁶⁹ on behalf of the following class (the “Damages Class”):

All commercial and institutional purchasers in the Indirect Purchaser States that purchased beef, once or more, other than directly from Defendants, entities owned or controlled by Defendants, or other producers of beef from January 1, 2015 to present for their own business use in commercial food preparation. Excluded from the Damages Class are the Court and its personnel, and any Defendants and their parent or subsidiary companies.

327. The Nationwide Class and the Damages Class are referred to herein as the “Classes.” Plaintiff reserves the right to modify the class definitions at a later date. While Plaintiff does not know the exact number of the members of the Classes, there are likely thousands of class members.

328. Common questions of law and fact exist as to all members of the Classes. This is particularly true given the nature of Defendants’ conspiracy, which was generally

⁶⁹ The Indirect Purchaser States include the following states (and territory): Arizona, Arkansas, California, District of Columbia, Florida, Iowa, Kansas, Maine, Michigan, Minnesota, Mississippi, Missouri, Nebraska, Nevada, New Hampshire, New Mexico, New York, North Carolina, North Dakota, Oregon, Rhode Island, South Carolina, South Dakota, Tennessee, Utah, Vermont, West Virginia, and Wisconsin.

applicable to all the members of both Classes, thereby making appropriate relief with respect to the Classes as a whole. Such questions of law and fact common to the Classes include, but are not limited to:

- (a) Whether Defendants and their co-conspirators engaged in a combination and conspiracy among themselves to fix, raise, maintain and/or stabilize prices of beef in the United States;
- (b) Whether Defendants and their co-conspirators participated in meetings and trade association conversations among themselves in the United States and elsewhere to implement, adhere to, and police the unlawful agreements that they reached;
- (c) The identity of the participants of the alleged conspiracy;
- (d) The duration of the alleged conspiracy and the acts carried out by Defendants and their co-conspirators in furtherance of the conspiracy;
- (e) Whether the alleged conspiracy violated the Sherman Act, as alleged in the First Count;
- (f) Whether the alleged conspiracy violated state antitrust and unfair competition laws, and/or state consumer protection laws, as alleged in the Second and Third Counts;
- (g) Whether Defendants unjustly enriched themselves to the detriment of the Plaintiff and the members of the Classes, thereby entitling Plaintiff and

the members of the Classes to disgorgement of all benefits derived by Defendants, as alleged in the Fourth Count;

(h) Whether the conduct of Defendants and their co-conspirators, as alleged in this Complaint, caused injury to the business or property of Plaintiff and the members of the Classes;

(i) The effect of the alleged conspiracy on the prices of beef sold in the United States during the Class Period;

(j) Whether the Defendants and their co-conspirators actively concealed, suppressed, and failed to disclose material facts to Plaintiff and members of the Classes concerning Defendants' unlawful activities to artificially inflate prices for beef, and/or fraudulently concealed the unlawful conspiracy's existence from Plaintiff and the other members of the Classes;

(k) The appropriate injunctive and related equitable relief for the Nationwide Class; and

(l) The appropriate class-wide measure of damages for the Damages Class.

329. Plaintiff's claims are typical of the claims of the members of the Classes. Plaintiff and all members of the Classes are similarly affected by Defendants' wrongful conduct in that they paid artificially inflated prices for beef purchased indirectly. Plaintiff's claims arise out of the same common course of conduct giving rise to the claims of the other members of the Classes.

330. Plaintiff will fairly and adequately protect the interests of the Classes. Plaintiff's interests are coincident with, and not antagonistic to, those of the other members of the Classes. Plaintiff is represented by counsel who are competent and experienced in the prosecution of antitrust and class action litigation.

331. The questions of law and fact common to the members of the Classes predominate over any questions affecting only individual members, including legal and factual issues relating to liability and damages.

332. Class action treatment is a superior method for the fair and efficient adjudication of the controversy, in that, among other things, such treatment will permit a large number of similarly situated persons to prosecute their common claims in a single forum simultaneously, efficiently, and without the unnecessary duplication of evidence, effort, and expense that numerous individual actions would engender. The benefits of proceeding through the class mechanism, including providing injured persons or entities with a method for obtaining redress for claims that might not be practicable to pursue individually, substantially outweigh any difficulties that may arise in management of this class action. Plaintiff reserves the discretion to certify the Damages Class as separate classes for each of the Indirect Purchaser States or as separate classes for certain groups of Indirect Purchaser States, should the Court's subsequent decisions in this case render that approach more efficient.

333. The prosecution of separate actions by individual members of the Classes would create a risk of inconsistent or varying adjudications, establishing incompatible standards of conduct for Defendants.

CAUSES OF ACTION

COUNT I

Violation of Section 1 of the Sherman Act (15 U.S.C. §§ 1, 3) **(Conspiracy in Restraint of Trade)**

334. Plaintiff incorporates and realleges, as though fully set forth herein, each and every allegation set forth in the preceding paragraphs of this Complaint.

335. At least as early as January 1, 2015, defendants and their co-conspirators entered into a continuing agreement in violation of the Sherman Act. This agreement is an unreasonable restraint of trade in violation of Section 1 of the Sherman Act, 15 U.S.C. § 1.

336. Defendants' acts in furtherance of their combination or conspiracy were authorized, ordered, or done by their officers, agents, employees, or representatives while actively engaged in the management of defendants' affairs.

337. Defendants' anticompetitive acts involved United States domestic commerce and other commerce, and had a direct, substantial, and foreseeable effect on interstate commerce by raising, fixing, and maintaining prices for beef throughout the United States.

338. The relevant product market is beef and the relevant geographic market is the continental United States.

339. Defendants possess market power in the Relevant Market.

340. Defendants could impose an increase in the price of beef collectively without causing many consumers and businesses to switch their purchases to another product. Beef constitutes a unique product market.

341. Defendants view the beef products as fungible. Beef products are generally interchangeable, permitting defendant integrators to readily to compare and match each other's pricing.

342. The defendants' collusive conduct has had the effect of (1) reducing and suppressing competition among defendants in the market for beef in the United States and (2) inflating the prices of beef during the Class Period.

343. As a result of defendants' unlawful conduct, plaintiff and the members of the Class have been harmed by being forced to pay inflated, supracompetitive prices for beef.

344. As a direct and proximate result of defendants' anticompetitive conduct, plaintiff and members of the Nationwide Class have been injured in their business or property and will continue to be injured in their business and property by paying more for beef than they would have paid and will pay in the absence of the conspiracy.

345. The alleged contract, combination, or conspiracy is a *per se* violation of the federal antitrust laws.

346. Plaintiff and members of the Nationwide Class are entitled to an injunction against Defendants, preventing and restraining the continuing violations alleged herein.

COUNT II

Violation of State Antitrust Statutes **(on behalf of Plaintiff and the Damages Class)**

347. Plaintiff repeats the allegations set forth above as if fully set forth herein, and each of the state-specific causes of action described below incorporates the allegations as if fully set forth therein.

348. During the Class Period, Defendants and their co-conspirators engaged in a continuing contract, combination, or conspiracy with respect to the sale of beef in unreasonable restraint of trade and commerce and in violation of the various state antitrust and other statutes set forth below.

349. The contract, combination, or conspiracy consisted of an agreement among Defendants and their co-conspirators to fix, raise, inflate, stabilize, and/or maintain at artificially supracompetitive prices for beef, including in the United States and its territories.

350. In formulating and effectuating this conspiracy, Defendants and their co-conspirators performed acts in furtherance of the combination and conspiracy, including agreeing to fix, increase, inflate, maintain, or stabilize effective prices of beef purchased by Plaintiff and members of the Damages Class; and (b) participating in meetings and trade association conversations among themselves in the United States and elsewhere to implement, adhere to, and police the unlawful agreements they reached.

351. Defendants and their co-conspirators engaged in the actions described above for the purpose of carrying out their unlawful agreements to fix, increase, maintain, or stabilize prices of beef. As a direct and proximate result, Plaintiff and members of the Damages Class were deprived of free and open competition and paid more for beef than they otherwise would have in the absence of Defendants' unlawful conduct. This injury is of the type the antitrust laws of the above states were designed to prevent and flows from that which makes Defendants' conduct unlawful.

352. In addition, Defendants have profited significantly from the conspiracy. Defendants' profits derived from their anticompetitive conduct come at the expense and detriment of Plaintiff and the members of the Damages Class.

353. Accordingly, Plaintiff and the members of the Damages Class in each of the following jurisdictions seek damages (including statutory damages where applicable), to be trebled or otherwise increased as permitted by a particular jurisdiction's antitrust law, and costs of suit, including reasonable attorneys' fees, to the extent permitted by the following state laws.

354. Defendants' anticompetitive acts described above were knowing, willful and constitute violations of the following state antitrust statutes.

355. **Arizona:** Defendants have entered into an unlawful agreement in restraint of trade in violation of Ariz. Rev. Stat. §44-1401, *et seq.* Defendants' conspiracies had the following effects: (1) price competition for beef was restrained, suppressed, and eliminated throughout Arizona; (2) beef prices were raised, fixed, maintained, and stabilized at

artificially high levels throughout Arizona. During the Class Period, Defendants' illegal conduct substantially affected Arizona commerce. Accordingly, Plaintiff and members of the Damages Class seek all forms of relief available under Ariz. Rev. Stat. §44-1401, *et seq.*

356. **California:** Defendants have entered into an unlawful agreement in restraint of trade in violation of Cal. Bus. & Prof. Code §16700, *et seq.* During the Class Period, Defendants and their co-conspirators entered into and engaged in a continuing unlawful trust in restraint of the trade and commerce described above in violation of Cal. Bus. & Prof. Code §16720. Each defendant has acted in violation of Cal. Bus. & Prof. Code §16720 to fix, raise, stabilize, and maintain prices of beef at supracompetitive levels. The violations of Cal. Bus. & Prof. Code §16720 consisted, without limitation, of a continuing unlawful trust and concert of action among Defendants and their co-conspirators, the substantial terms of which were to fix, raise, maintain, and stabilize the prices of beef. For the purpose of forming and effectuating the unlawful trust, Defendants and their co-conspirators have done those things which they combined and conspired to do, including, but not limited to, the acts, practices and course of conduct set forth above, and creating a price floor, fixing, raising, and stabilizing the price of beef. The combination and conspiracy alleged herein has had, *inter alia*, the following effects: (1) price competition for beef has been restrained, suppressed, and/or eliminated in the State of California; (2) prices for beef provided by Defendants and their co-conspirators have been fixed, raised, stabilized, and pegged at artificially high, non-competitive levels in the State of California

and throughout the United States; and (3) those who purchased beef indirectly from Defendants and their co-conspirators have been deprived of the benefit of free and open competition. As a result of Defendants' violation of Cal. Bus. & Prof. Code §16720, Plaintiff and members of the Damages Class seek treble damages and their cost of suit, including a reasonable attorneys' fee, pursuant to Cal. Bus. & Prof. Code §16750(a).

357. **District of Columbia:** Defendants have entered into an unlawful agreement in restraint of trade in violation of D.C. Code §28-4501, *et seq.* Defendants' combinations or conspiracies had the following effects: (1) beef price competition was restrained, suppressed, and eliminated throughout the District of Columbia; (2) beef prices were raised, fixed, maintained, and stabilized at artificially high levels throughout the District of Columbia; (3) Plaintiff and members of the Damages Class, including those who resided in the District of Columbia and purchased beef in the District of Columbia, paid supracompetitive, artificially inflated prices for beef, including in the District of Columbia. During the Class Period, Defendants' illegal conduct substantially affected commerce in the District of Columbia. By reason of the foregoing, Defendants have entered into agreements in restraint of trade in violation of D.C. Code §28-4501, *et seq.* Accordingly, Plaintiff and members of the Damages Class seek all forms of relief available under D.C. Code §28-4501, *et seq.*

358. **Iowa:** Defendants have entered into an unlawful agreement in restraint of trade in violation of Iowa Code §553.1, *et seq.* Defendants' combinations or conspiracies had the following effects: (1) beef price competition was restrained, suppressed, and

eliminated throughout Iowa; (2) beef prices were raised, fixed, maintained and stabilized at artificially high levels throughout Iowa. During the Class Period, Defendants' illegal conduct substantially affected Iowa commerce. By reason of the foregoing, Defendants have entered into agreements in restraint of trade in violation of Iowa Code §553.1, *et seq.* Accordingly, Plaintiff and members of the Damages Class seek all forms of relief available under Iowa Code §553.1, *et seq.*

359. **Kansas:** Defendants have entered into an unlawful agreement in restraint of trade in violation of Kan. Stat. §50-101, *et seq.* Defendants' combinations or conspiracies had the following effects: (1) beef price competition was restrained, suppressed, and eliminated throughout Kansas; (2) beef prices were raised, fixed, maintained, and stabilized at artificially high levels throughout Kansas. During the Class Period, Defendants' illegal conduct substantially affected Kansas commerce. Accordingly, Plaintiff and members of the Damages Class seek all forms of relief available under Kan. Stat. §50-101, *et seq.*

360. **Maine:** Defendants have entered into an unlawful agreement in restraint of trade in violation of Me. Rev. Stat. Ann. tit. 10, § 1101. Defendants' combinations or conspiracies had the following effects: (1) beef price competition was restrained, suppressed, and eliminated throughout Maine; (2) beef prices were raised, fixed, maintained, and stabilized at artificially high levels throughout Maine. During the Class Period, Defendants' illegal conduct substantially affected Maine commerce. Accordingly, Plaintiff and members of the Damages Class seek all relief available under Me. Rev. Stat. Ann. tit. 10, § 1104.

361. **Michigan:** Defendants have entered into an unlawful agreement in restraint of trade in violation of Mich. Comp. Laws §445.771, *et seq.* Defendants' combinations or conspiracies had the following effects: (1) beef price competition was restrained, suppressed, and eliminated throughout Michigan; (2) beef prices were raised, fixed, maintained, and stabilized at artificially high levels throughout Michigan. During the Class Period, Defendants' illegal conduct substantially affected Michigan commerce. Accordingly, Plaintiff and members of the Damages Class seek all relief available under Mich. Comp. Laws §445.771, *et seq.*

362. **Minnesota:** Defendants have entered into an unlawful agreement in restraint of trade in violation of Minn. Stat. §325D.49, *et seq.* Defendants' combinations or conspiracies had the following effects: (1) beef price competition was restrained, suppressed, and eliminated throughout Minnesota; (2) beef prices were raised, fixed, maintained, and stabilized at artificially high levels throughout Minnesota. During the Class Period, Defendants' illegal conduct substantially affected Minnesota commerce. Accordingly, Plaintiff and members of the Damages Class seek all relief available under Minn. Stat. §325D.49, *et seq.*

363. **Mississippi:** Defendants have entered into an unlawful agreement in restraint of trade in violation of Miss. Code §75-21-1, *et seq.* Defendants' combinations or conspiracies had the following effects: (1) beef price competition was restrained, suppressed, and eliminated throughout Mississippi; (2) beef prices were raised, fixed, maintained, and stabilized at artificially high levels throughout Mississippi. During the

Class Period, Defendants' illegal conduct substantially affected Mississippi commerce. Accordingly, Plaintiff and members of the Damages Class seek all relief available under Miss. Code §75-21-1, *et seq.*

364. **Nebraska:** Defendants have entered into an unlawful agreement in restraint of trade in violation of Neb. Rev. Stat. §59-801, *et seq.* Defendants' combinations or conspiracies had the following effects: (1) beef price competition was restrained, suppressed, and eliminated throughout Nebraska; (2) beef prices were raised, fixed, maintained, and stabilized at artificially high levels throughout Nebraska. During the Class Period, Defendants' illegal conduct substantially affected Nebraska commerce. Accordingly, Plaintiff and members of the Damages Class seek all relief available under Neb. Rev. Stat. §59-801, *et seq.*

365. **Nevada:** Defendants have entered into an unlawful agreement in restraint of trade in violation of Nev. Rev. Stat. Ann. §598A.010, *et seq.* Defendants' combinations or conspiracies had the following effects: (1) beef price competition was restrained, suppressed, and eliminated throughout Nevada; (2) beef prices were raised, fixed, maintained, and stabilized at artificially high levels throughout Nevada. During the Class Period, Defendants' illegal conduct substantially affected Nevada commerce. Accordingly, Plaintiff and members of the Damages Class seek all relief available under Nev. Rev. Stat. Ann. §598A.010, *et seq.*

366. **New Hampshire:** Defendants have entered into an unlawful agreement in restraint of trade in violation of New Hampshire Revised Statutes Ann. §356:1.

Defendants' combinations or conspiracies had the following effects: (1) beef price competition was restrained, suppressed, and eliminated throughout New Hampshire; (2) beef prices were raised, fixed, maintained, and stabilized at artificially high levels throughout New Hampshire. During the Class Period, Defendants' illegal conduct substantially affected New Hampshire commerce. Accordingly, Plaintiff and members of the Damages Class seek all relief available under New Hampshire Revised Statutes §356:1, *et seq.*

367. **New Mexico:** Defendants have entered into an unlawful agreement in restraint of trade in violation of New Mexico Statutes Annotated § 57-1-1, *et seq.* Defendants' combinations or conspiracies had the following effects: (1) beef price competition was restrained, suppressed, and eliminated throughout New Mexico; (2) beef prices were raised, fixed, maintained, and stabilized at artificially high levels throughout New Mexico. During the Class Period, Defendants' illegal conduct substantially affected New Mexico commerce. Accordingly, Plaintiff and members of the Damages Class seek all relief available under New Mexico Statutes Annotated § 57-1-1, *et seq.*

368. **New York:** Defendants have entered into an unlawful agreement in restraint of trade in violation of New York General Business Laws § 340, *et seq.* Defendants' combinations or conspiracies had the following effects: (1) beef price competition was restrained, suppressed, and eliminated throughout New York; (2) beef prices were raised, fixed, maintained, and stabilized at artificially high levels throughout New York. During the Class Period, Defendants' illegal conduct substantially affected New York commerce.

The conduct set forth above is a per se violation of the Donnelly Act, § 340, *et seq.* Accordingly, Plaintiff and members of the Damages Class seek all relief available under New York General Business Laws § 340, *et seq.*

369. **North Carolina:** Defendants have entered into an unlawful agreement in restraint of trade in violation of North Carolina General Statutes § 75-1, *et seq.* Defendants' combinations or conspiracies had the following effects: (1) beef price competition was restrained, suppressed, and eliminated throughout North Carolina; (2) beef prices were raised, fixed, maintained, and stabilized at artificially high levels throughout North Carolina; During the Class Period, Defendants' illegal conduct substantially affected North Carolina commerce. Accordingly, Plaintiff and members of the Damages Class seek all relief available under North Carolina General Statutes § 75-16, *et seq.*

370. **North Dakota:** Defendants have entered into an unlawful agreement in restraint of trade in violation of N.D. Cent. Code §51-08.1-01, *et seq.* Defendants' combinations or conspiracies had the following effects: (1) beef price competition was restrained, suppressed, and eliminated throughout North Dakota; (2) beef prices were raised, fixed, maintained, and stabilized at artificially high levels throughout North Dakota. During the Class Period, Defendants' illegal conduct had a substantial effect on North Dakota commerce. Accordingly, Plaintiff and members of the Damages Class seek all relief available under N.D. Cent. Code §51-08.1-01, *et seq.*

371. **Oregon:** Defendants have entered into an unlawful agreement in restraint of trade in violation of Or. Rev. Stat. § 646.725, *et seq.* Defendants' combinations or

conspiracies had the following effects: (1) beef price competition was restrained, suppressed and eliminated throughout Oregon; (2) beef prices were raised, fixed, maintained and stabilized at artificially high levels throughout Oregon. During the Class Period, Defendants' illegal conduct had a substantial effect on Oregon commerce. Accordingly, Plaintiff and members of the Damages Class seek all relief available under Or. Rev. Stat. § 646.780, *et seq.*

372. **Rhode Island:** Defendants have entered into an unlawful agreement in restraint of trade in violation of Rhode Island General Laws § 6-36-4, *et seq.* The Rhode Island statutes allow actions on behalf of indirect purchasers for conduct during the Class Period. Defendants' combinations or conspiracies had the following effects: (1) beef price competition was restrained, suppressed, and eliminated throughout Rhode Island; (2) beef prices were raised, fixed, maintained, and stabilized at artificially high levels throughout Rhode Island. During the Class Period, Defendants' illegal conduct had a substantial effect on Rhode Island commerce. Accordingly, Plaintiff and members of the Damages Class seek all relief available under Rhode Island General Laws § 6-36-11, *et seq.*

373. **South Dakota:** Defendants have entered into an unlawful agreement in restraint of trade in violation of South Dakota Codified Laws § 37-1-3.1, *et seq.* Defendants' combinations or conspiracies had the following effects: (1) beef price competition was restrained, suppressed, and eliminated throughout South Dakota; (2) beef prices were raised, fixed, maintained, and stabilized at artificially high levels throughout South Dakota. During the Class Period, Defendants' illegal conduct had a substantial effect

on South Dakota commerce. Accordingly, Plaintiff and members of the Damages Class seek all relief available under South Dakota Codified Laws § 37-1-3.1, *et seq.*

374. **Tennessee:** Defendants have entered into an unlawful agreement in restraint of trade in violation of Tenn. Code Ann. §47-25-101, *et seq.* Defendants' combinations or conspiracies had the following effects: (1) beef price competition was restrained, suppressed, and eliminated throughout Tennessee; (2) beef prices were raised, fixed, maintained, and stabilized at artificially high levels throughout Tennessee. During the Class Period, Defendants' illegal conduct had a substantial effect on Tennessee commerce. Accordingly, Plaintiff and members of the Damages Class seek all relief available under Tenn. Code Ann. §47-25-101, *et seq.*

375. **Utah:** Defendants have entered into an unlawful agreement in restraint of trade in violation of Utah Code Annotated § 76-10-3101, *et seq.* Defendants' combinations or conspiracies had the following effects: (1) beef price competition was restrained, suppressed, and eliminated throughout Utah; (2) beef prices were raised, fixed, maintained, and stabilized at artificially high levels throughout Utah. During the Class Period, Defendants' illegal conduct had a substantial effect on Utah commerce. Accordingly, Plaintiff and members of the Damages Class seek all relief available under Utah Code Annotated § 76-10-3101, *et seq.*

376. **Vermont:** Defendants have entered into an unlawful agreement in restraint of trade in violation of 9 Vermont Stat. Ann. § 2453, *et seq.* Defendants' combinations or conspiracies had the following effects: (1) beef price competition was restrained,

suppressed, and eliminated throughout Vermont; (2) beef prices were raised, fixed, maintained, and stabilized at artificially high levels throughout Vermont. During the Class Period, Defendants' illegal conduct had a substantial effect on Vermont commerce. Accordingly, Plaintiff and members of the Damages Class seek all relief available under 9 V.S.A. § 2465, *et seq.*

377. **West Virginia:** Defendants have entered into an unlawful agreement in restraint of trade in violation of West Virginia Code § 47-18-3, *et seq.* Defendants' combinations or conspiracies had the following effects: (1) beef price competition was restrained, suppressed, and eliminated throughout West Virginia; (2) beef prices were raised, fixed, maintained, and stabilized at artificially high levels throughout West Virginia. During the Class Period, Defendants' illegal conduct had a substantial effect on West Virginia commerce. Accordingly, Plaintiff and members of the Damages Class seek all relief available under West Virginia Code § 47-18-9, *et seq.*

378. **Wisconsin:** Defendants have entered into an unlawful agreement in restraint of trade in violation of Wis. Stat. §133.01, *et seq.* Defendants' combinations or conspiracies had the following effects: (1) beef price competition was restrained, suppressed, and eliminated throughout Wisconsin; (2) beef prices were raised, fixed, maintained, and stabilized at artificially high levels throughout Wisconsin. During the Class Period, Defendants' illegal conduct had a substantial effect on Wisconsin commerce. Accordingly, Plaintiff and members of the Damages Class seek all relief available under Wis. Stat. §133.01, *et seq.*

COUNT III

Violation of State Consumer Protection Statutes (on Behalf of Plaintiff and the Damages Class)

379. Plaintiff repeats the allegations set forth above as if fully set forth herein, and each of the state-specific causes of action described below incorporates the allegations as if fully set forth therein.

380. Defendants engaged in unfair competition or unfair, unconscionable, deceptive or fraudulent acts or practices in violation of the state consumer protection and unfair competition statutes listed below.

381. **Arkansas:** Defendants have knowingly entered into an unlawful agreement in restraint of trade in violation of Ark. Code Ann. §4-88-101, *et seq.* Defendants knowingly agreed to, and did in fact, act in restraint of trade or commerce by affecting, fixing, controlling, and/or maintaining at non-competitive and artificially inflated levels, the prices at which beef was sold, distributed, or obtained in Arkansas and took efforts to conceal their agreements from Plaintiff and members of the Damages Class. The aforementioned conduct on the part of the Defendants constituted “unconscionable” and “deceptive” acts or practices in violation of Ark. Code Ann. §4-88-107(a)(10). Defendants’ unlawful conduct had the following effects: (1) beef price competition was restrained, suppressed, and eliminated throughout Arkansas; (2) beef prices were raised, fixed, maintained, and stabilized at artificially high levels throughout Arkansas. During the Class Period, Defendants’ illegal conduct substantially affected Arkansas commerce and

consumers. Defendants have engaged in unfair competition or unfair or deceptive acts or practices in violation of Ark. Code Ann. §4-88-107(a)(10) and, accordingly, Plaintiff and the members of the Damages Class seek all relief available under that statute.

382. **California:** Defendants have engaged in unfair competition or unfair, unconscionable, deceptive or fraudulent acts or practices in violation of Cal. Bus. & Prof. Code §17200, *et seq.* During the Class Period, Defendants manufactured, marketed, sold, or distributed beef in California, and committed and continue to commit acts of unfair competition, as defined by Cal. Bus. & Prof. Code §17200, *et seq.*, by engaging in the acts and practices specified above. This claim is instituted pursuant to Cal. Bus. & Prof. Code §§17203 and 17204, to obtain restitution from these Defendants for acts, as alleged herein, that violated Cal. Bus. & Prof. Code §17200, commonly known as the Unfair Competition Law. Defendants' conduct as alleged herein violated Cal. Bus. & Prof. Code §17200. The acts, omissions, misrepresentations, practices and nondisclosures of Defendants, as alleged herein, constituted a common, continuous, and continuing course of conduct of unfair competition by means of unfair, unlawful, and/or fraudulent business acts or practices within the meaning of Cal. Bus. & Prof. Code §17200, *et seq.*, including, but not limited to, the following: (1) the violations of §1 of the Sherman Act, as set forth above; (2) the violations of Cal. Bus. & Prof. Code §16720, *et seq.*, set forth above. Defendants' acts, omissions, misrepresentations, practices, and non-disclosures, as described above, whether or not in violation of Cal. Bus. & Prof. Code §16720, *et seq.*, and whether or not concerted or independent acts, are otherwise unfair, unconscionable unlawful or fraudulent; (3)

Defendants' acts or practices are unfair to purchasers of beef in the State of California within the meaning of Cal. Bus. & Prof. Code §17200 *et. seq.*; and (4) Defendants' acts and practices are fraudulent or deceptive within the meaning of Cal. Bus. & Prof. Code §17200, *et seq.* Plaintiff and members of the Damages Class are entitled to full restitution and/or disgorgement of all revenues, earnings, profits, compensation and benefits that may have been obtained by Defendants as a result of such business acts or practices. The illegal conduct alleged herein is continuing and there is no indication that Defendants will not continue such activity into the future. The unlawful and unfair business practices of Defendants, and each of them, as described above, have caused and continue to cause Plaintiff and the members of the Damages Class to pay supracompetitive and artificially inflated prices for beef. Plaintiff and the members of the Damages Class suffered injury in fact and lost money or property as a result of such unfair competition. The conduct of Defendants as alleged in this Complaint violates Cal. Bus. & Prof. Code §17200, *et seq.* As alleged in this Complaint, Defendants and their co-conspirators have been unjustly enriched as a result of their wrongful conduct and by Defendants' unfair competition. Plaintiff and the members of the Damages Class are accordingly entitled to equitable relief including restitution and/or disgorgement of all revenues, earnings, profits, compensation and benefits that may have been obtained by Defendants as a result of such business practices, pursuant to Cal. Bus. & Prof. Code §§17203 and 17204.

383. **Florida:** Defendants have engaged in unfair competition or unfair, unconscionable, or deceptive acts or practices in violation of the Florida Deceptive and

Unfair Trade Practices Act, Fla. Stat. §501.201, *et seq.* Defendants' unlawful conduct had the following effects: (1) beef price competition was restrained, suppressed, and eliminated throughout Florida; (2) beef prices were raised, fixed, maintained, and stabilized at artificially high levels throughout Florida. During the Class Period, Defendants' illegal conduct substantially affected Florida commerce and consumers. Accordingly, plaintiff and members of the Damages Class seek all relief available under Fla. Stat. §501.201, *et seq.*

384. **Minnesota:** Defendants have engaged in unfair competition or unfair, unconscionable, or deceptive acts or practices in violation of the Minnesota Uniform Deceptive Trade Practices Act, Minn. Stat. § 325D.43, *et seq.* Defendants engaged in unfair and deceptive trade practices during the course of their business dealings, which significantly impacted Plaintiff as a purchaser of the Defendants' goods, and which caused Plaintiff to suffer injury. Defendants took efforts to conceal their agreements from Plaintiff and the members of the Damages Class. Defendants' unlawful conduct had the following effects: (1) beef price competition was restrained, suppressed, and eliminated throughout Minnesota; (2) beef prices were raised, fixed, maintained, and stabilized at artificially high levels throughout Minnesota. During the Class Period, Defendants' illegal conduct substantially affected Minnesota commerce and beef purchasers. Defendants have engaged in unfair competition or unfair or deceptive acts or practices in violation of Minn. Stat. § 325D.43, *et seq.*, and, accordingly, Plaintiff and members of the Damages Class seek all relief available under that statute and as equity demands.

385. **New Mexico:** Defendants have engaged in unfair competition or unfair, unconscionable, or deceptive acts or practices in violation of New Mexico Stat. § 57-12-1, *et seq.* In New Mexico, price-fixing is actionable as an “unconscionable trade practice” under N.M. Stat. § 57-12-2(E) because it “takes advantage of the lack of knowledge ... of a person to a grossly unfair degree” and also results in a “gross disparity between the value received by a person and the price paid.” Defendants had the sole power to set that price, and Plaintiff and members of the Damages Class had no meaningful ability to negotiate a lower price from wholesalers. Moreover, Plaintiff and members of the Damages Class lacked any meaningful choice in purchasing beef because they were unaware of the unlawful overcharge, and there was no alternative source of supply through which Plaintiff and members of the Damages Class could avoid the overcharges. Defendants’ conduct with regard to sales of beef, including their illegal conspiracy to secretly fix the price of beef at supracompetitive levels and overcharge consumers, was substantively unconscionable because it was one-sided and unfairly benefited Defendants at the expense of Plaintiff and the public. Defendants took grossly unfair advantage of Plaintiff and members of the Damages Class. Defendants’ unlawful conduct had the following effects: (1) beef price competition was restrained, suppressed and eliminated throughout New Mexico; (2) beef prices were raised, fixed, maintained and stabilized at artificially high levels throughout New Mexico; (3) Plaintiff and members of the Damages Class were deprived of free and open competition; and (4) Plaintiff and members of the Damages Class paid supracompetitive, artificially inflated prices for beef. During the Class Period, Defendants’

illegal conduct substantially affected New Mexico commerce and consumers. As a direct and proximate result of Defendants' unlawful conduct, Plaintiff and members of the Damages Class have been injured and are threatened with further injury. Defendants have engaged in unfair competition or unfair or deceptive acts or practices in violation of New Mexico Stat. § 57-12-1, *et seq.*, and, accordingly, Plaintiff and members of the Damages Class seek all relief available under that statute.

386. **North Carolina:** Defendants have engaged in unfair competition or unfair, unconscionable, or deceptive acts or practices in violation of N.C. Gen. Stat. §75-1.1, *et seq.* Defendants agreed to, and did in fact, act in restraint of trade or commerce by affecting, fixing, controlling and/or maintaining, at artificial and non-competitive levels, the prices at which beef were sold, distributed or obtained in North Carolina and took efforts to conceal their agreements from Plaintiff and members of the Damages Class. Defendants' price-fixing conspiracy could not have succeeded absent deceptive conduct by Defendants to cover up their illegal acts. Secrecy was integral to the formation, implementation and maintenance of Defendants' price-fixing conspiracy. Defendants committed inherently deceptive and self-concealing actions, of which Plaintiff could not possibly have been aware. Defendants and their co-conspirators publicly provided pretextual and false justifications regarding their price increases. The conduct of Defendants described herein constitutes consumer-oriented deceptive acts or practices within the meaning of North Carolina law, which resulted in consumer injury and injury to commercial and institutional indirect purchasers along with broad adverse impact on the

public at large, and harmed the public interest of North Carolina consumers and commercial and institutional indirect purchasers in an honest marketplace in which economic activity is conducted in a competitive manner. Defendants' unlawful conduct had the following effects: (1) beef price competition was restrained, suppressed and eliminated throughout North Carolina; (2) beef prices were raised, fixed, maintained and stabilized at artificially high levels throughout North Carolina; (3) Plaintiff and members of the Damages Class were deprived of free and open competition; and (4) Plaintiff and members of the Damages Class paid supracompetitive, artificially inflated prices for beef. During the Class Period, Defendants marketed, sold, or distributed beef in North Carolina, and Defendants' illegal conduct substantially affected North Carolina commerce and consumers. During the Class Period, each of the Defendants named herein, directly, or indirectly and through affiliates they dominated and controlled, manufactured, sold and/or distributed beef in North Carolina. Plaintiff and members of the Damages Class seek actual damages for their injuries caused by these violations in an amount to be determined at trial and are threatened with further injury. Defendants have engaged in unfair competition or unfair or deceptive acts or practices in violation of N.C. Gen. Stat. §75-1.1, *et seq.*, and, accordingly, Plaintiff and members of the Damages Class seek all relief available under that statute.

387. **South Carolina:** Defendants have engaged in unfair competition or unfair, unconscionable, or deceptive acts or practices in violation of the South Carolina Unfair Trade Practices Act, S.C. Code Ann. §39-5-10 *et seq.* Defendants' combinations or

conspiracies had the following effects: (1) beef price competition was restrained, suppressed and eliminated throughout South Carolina; (2) beef prices were raised, fixed, maintained and stabilized at artificially high levels throughout South Carolina. During the Class Period, Defendants' illegal conduct had a substantial effect on South Carolina commerce. As a direct and proximate result of Defendants' unlawful conduct, Plaintiff and members of the Damages Class have been injured in their business and property and are threatened with further injury. Defendants have engaged in unfair competition or unfair or deceptive acts or practices in violation of S.C. Code Ann. §39-5-10 *et seq.*, and, accordingly, Plaintiff and the members of the Damages Class seek all relief available under that statute.

388. **Vermont:** Defendants have engaged in unfair competition or unfair, unconscionable, or deceptive acts or practices in violation of 9 Vermont Stat. Ann. § 2451, *et seq.* Defendants agreed to, and did in fact, act in restraint of trade or commerce in a market that includes Vermont, by affecting, fixing, controlling, and/or maintaining, at artificial and non-competitive levels, the prices at which beef were sold, distributed, or obtained in Vermont. Defendants deliberately failed to disclose material facts to Plaintiff and members of the Damages Class concerning Defendants' unlawful activities and artificially inflated prices for beef. Defendants owed a duty to disclose such facts, and Defendants breached that duty by their silence. Defendants misrepresented to all purchasers during the Class Period that Defendants' beef prices were competitive and fair. During the Class Period, Defendants' illegal conduct had a substantial effect on Vermont

commerce and consumers. As a direct and proximate result of Defendants' violations of law, Plaintiff and members of the Damages Class suffered an ascertainable loss of money or property as a result of Defendants' use or employment of unconscionable and deceptive commercial practices as set forth above. That loss was caused by Defendants' willful and deceptive conduct, as described herein. Defendants' deception, including their affirmative misrepresentations and omissions concerning the price of beef, likely misled all commercial and institutional indirect purchasers acting reasonably under the circumstances to believe that they were purchasing beef at prices set by a free and fair market. Defendants' misleading conduct and unconscionable activities constitutes unfair competition or unfair or deceptive acts or practices in violation of 9 Vermont § 2451, *et seq.*, and, accordingly, Plaintiff and members of the Damages Class seek all relief available under that statute.

389. **Wisconsin:** Defendants have engaged in unfair competition or unfair, unconscionable, or deceptive acts or practices in violation of the Wisconsin Consumer Protection Statutes, Wisc. Stat. § 100.18, *et seq.* Defendants agreed to, and did in fact, act in restraint of trade or commerce in a market that includes Wisconsin, by affecting, fixing, controlling, and/or maintaining, at artificial and non-competitive levels, the prices at which beef was sold, distributed, or obtained in Wisconsin. Defendants affirmatively misrepresented to all purchasers during the Class Period that Defendants' beef prices were competitive and fair. Defendants' unlawful conduct had the following effects: (1) price competition for the beef was restrained, suppressed, and eliminated throughout Wisconsin; (2) beef prices were raised, fixed, maintained, and stabilized at artificially high levels

throughout Wisconsin. Defendants' illegal conduct substantially affected Wisconsin commerce and purchasers of beef. As a direct and proximate result of Defendants' violations of law, Plaintiff and members of the Damages Class suffered an ascertainable loss of money or property as a result of Defendants' use or employment of unconscionable and deceptive commercial practices as set forth above. That loss was caused by Defendants' willful and deceptive conduct, as described herein. Defendants' deception, including their affirmative misrepresentations concerning the price of beef at issue, misled all purchasers acting reasonably under the circumstances to believe that they were purchasing beef at prices set by a free and fair market. Defendants' affirmative misrepresentations constitute information important to Plaintiff and members of the Damages Class as they related to the cost of beef they purchased. Defendants have engaged in unfair competition or unfair or deceptive acts or practices in violation of Wisc. Stat. § 100.18, *et seq.*, and, accordingly, Plaintiff and members of the Damages Class seek all relief available under that statute.

COUNT IV

Unjust Enrichment⁷⁰ **(on behalf of Plaintiff and the Damages Class)**

390. Plaintiff incorporates by reference the allegations set forth above as if fully set forth herein.

⁷⁰ Unjust enrichment claims are alleged herein under the laws of the states for which claims are alleged in Counts Two and Three above, except for Florida and New Hampshire. Plaintiff continues to assert a claim under the unjust enrichment law of Missouri.

391. To the extent required, this claim is pleaded in the alternative to the other claims in this Complaint.

392. Defendants have unlawfully benefited from their sales of beef because of the unlawful and inequitable acts alleged in this Complaint. Defendants unlawfully overcharged privately held commercial and institutional indirect purchasers, which purchased beef at prices that were more than they would have been but for Defendants' unlawful actions.

393. Defendants' financial benefits resulting from their unlawful and inequitable acts are traceable to overpayments by Plaintiff and members of the Damages Class.

394. Plaintiff and the Damages Class have conferred upon Defendants an economic benefit, in the nature of profits resulting from unlawful overcharges, to the economic detriment of Plaintiff and the Damages Class.

395. Defendants have been enriched by revenue resulting from unlawful overcharges for beef while Plaintiff and members of the Damages Class has been impoverished by the overcharges they paid for beef imposed through Defendants' unlawful conduct. Defendants' enrichment and the impoverishment of Plaintiff and members of the Damages Class are connected.

396. There is no justification for Defendants' retention of, and enrichment from, the benefits they received, which caused impoverishment to Plaintiff and the Damages Class, because Plaintiff and the Damages Class paid supracompetitive prices that inured to

Defendants' benefit, and it would be inequitable for Defendants to retain any revenue gained from their unlawful overcharges.

397. Plaintiff did not interfere with Defendants' affairs in any manner that conferred these benefits upon Defendants.

398. The benefits conferred upon Defendants were not gratuitous, in that they constituted revenue created by unlawful overcharges arising from Defendants' illegal and unfair actions to inflate the prices of beef.

399. The benefits conferred upon Defendants are measurable, in that the revenue Defendants have earned due to their unlawful overcharges of beef are ascertainable by review of sales records.

400. It would be futile for Plaintiff and the Damages Class to seek a remedy from any party with whom they have privity of contract. Defendants have paid no consideration to any other person for any of the unlawful benefits they received indirectly from Plaintiff and the Damages Class with respect to Defendants' sales of beef.

401. It would be futile for Plaintiff and the Damages Class to seek to exhaust any remedy against the immediate intermediary in the chain of distribution from which they indirectly purchased beef, as the intermediaries are not liable and cannot reasonably be expected to compensate Plaintiff and the Damages Class for Defendants' unlawful conduct.

402. The economic benefit of overcharges and monopoly profits derived by Defendants through charging supracompetitive and artificially inflated prices for beef is a direct and proximate result of Defendants' unlawful practices.

403. The financial benefits derived by Defendants rightfully belong to Plaintiff and the Damages Class, because Plaintiff and the Damages Class paid supracompetitive prices during the Class Period, inuring to the benefit of Defendants.

404. It would be inequitable under unjust enrichment principles under the law of the District of Columbia and the laws of all states and territories of the United States, except California, Ohio and Indiana, for Defendants to be permitted to retain any of the overcharges for beef derived from Defendants' unlawful, unfair, and unconscionable methods, acts, and trade practices alleged in this Complaint.

405. Defendants are aware of and appreciate the benefits bestowed upon them by Plaintiff and the Damages Class. Defendants consciously accepted the benefits and continue to do so as of the date of this filing, as beef prices remain inflated above pre-conspiracy levels.

406. Defendants should be compelled to disgorge in a common fund for the benefit of Plaintiff and the Damages Class all unlawful or inequitable proceeds they received from their sales of beef.

407. A constructive trust should be imposed upon all unlawful or inequitable sums received by Defendants traceable to indirect purchases of beef by Plaintiff and the Damages Class.

V. REQUEST FOR RELIEF

WHEREFORE, plaintiff, on behalf of itself and the Class of all others so similarly situated, respectfully requests judgment against defendants as follows:

408. The Court determine that this action may be maintained as a class action under Rule 23(a), (b)(2), and (b)(3) of the Federal Rules of Civil Procedure, appoint plaintiff as Class Representatives and their counsel of record as Class Counsel, and direct that notice of this action, as provided by Rule 23(c)(2) of the Federal Rules of Civil Procedure, be given to the Class, once certified;

409. The unlawful conduct, conspiracy or combination alleged herein be adjudged and decreed: (a) an unreasonable restraint of trade or commerce in violation of Section 1 of the Sherman Act; (b) a *per se* violation of Section 1 of the Sherman Act; (c) an unlawful combination, trust, agreement, understanding and/or concert of action in violation of the state antitrust and unfair competition and consumer protection laws as set forth herein; or, alternatively, (d) acts of unjust enrichment by Defendants as set forth herein.

410. Plaintiff and the Class recover damages, to the maximum extent allowed under the applicable state laws, and that a joint and several judgments in favor of plaintiff and the members of the Damages Class be entered against defendants in an amount to be trebled to the extent such laws permit;

411. Plaintiff and members of the Damages Class recover damages, to the maximum extent allowed by such laws, in the form of restitution and/or disgorgement of profits unlawfully obtained;

412. Plaintiff and members of the Damages Class be awarded restitution, including disgorgement of profits Defendants obtained as a result of their acts of unfair competition and acts of unjust enrichment, and the Court establish of a constructive trust

consisting of all ill-gotten gains from which Plaintiff and members of the Damages Class may make claims on a *pro rata* basis;

413. Defendants, their affiliates, successors, transferees, assignees and other officers, directors, partners, agents and employees thereof, and all other persons acting or claiming to act on their behalf or in concert with them, be permanently enjoined and restrained from in any manner continuing, maintaining or renewing the conduct, conspiracy, or combination alleged herein, or from entering into any other conspiracy or combination having a similar purpose or effect, and from adopting or following any practice, plan, program, or device having a similar purpose or effect;

414. Defendants, their affiliates, successors, transferees, assignees and other officers, directors, partners, agents and employees thereof, and all other persons acting or claiming to act on their behalf or in concert with them, be permanently enjoined and restrained from in any manner continuing, maintaining, or renewing the sharing of highly sensitive competitive information that permits individual identification of company's information;

415. Plaintiff and the members of the Damages Class be awarded pre- and post-judgment interest as provided by law, and that such interest be awarded at the highest legal rate from and after the date of service of this Complaint;

416. Plaintiff and the members of the Classes recover their costs of suit, including reasonable attorneys' fees, as provided by law; and

417. Plaintiff and the members of the Classes have such other and further relief as the case may require and the Court may deem just and proper.

VI. JURY TRIAL DEMANDED

418. Plaintiff demands a trial by jury, pursuant to Rule 38(b) of the Federal Rules of Civil Procedure, of all issues so triable.

Dated: October 15, 2021

Respectfully submitted,
